

2007 REGISTRATIONS

The Registration process is only as good as the people who register their plants, and the quality of the information that they provide. I want to thank all who have taken the time to make this an informative and educational effort. There are 142 new registrations for 2007. There are now a total of 3790 registered hostas. As the comprehensive index has become longer than the yearly registrations we are moving to publish the index every third year. You are reminded that last year's comprehensive index includes all but this year's registrations, we will also maintain a complete index on the Registrar's Web site between hardcopy versions. Under the *International Code of Nomenclature for Cultivated Plants* (ICNCP), registrations are established when printed in a publication that reaches the general public. Thus, although these and other names may appear elsewhere, especially if only found in electronic media, they may not be established. (See also, **Plant Patents, Plant Breeder's Rights and Establishment** below.)

The simplified registration form (included at the end of this publication) was introduced in June of 1998. Part of the simplification was to give registrants the option to place their cultivar in a more general category rather than give the specific dimensions. These categories (miniature, small, med., large, and giant) are somewhat arbitrary. Thus, if possible, please provide actual measurements as this will prove more informative to those who read these pages. Please try to provide as much information as possible.

Under parentage information (found within the brackets at the end of each cultivar entry) the category of "parentage unknown" was added in 1997. As is consistent with the registrar's policy of attempting to provide the most informative descriptions, I considered adding a category this year. I did not, but request registrant's be more informative in the future where the parentage information submitted provides no guidance as to the parentage, such as [seedling × seedling] or [sport of stabilized seedling of unknown parents]. This does not imply anything regarding the validity of information submitted by the registrant, only that the description as registered adds nothing to the genetic, or parentage knowledge base. Parentage information published with registrations is intended to be "known parentage" as opposed to guesses, educated or otherwise. The abbreviation "TC" is used to indicate "tissue culture."

In reviewing this year's submissions, I have become aware that one of the more confusing sections to fill out is regarding the "origin" of the cultivar being registered. Many persons who have listed themselves as the originator, are also indicating that the seedling or sport that was used for measurement purposes to complete the registration was obtained from the originator. If you are the originator you did not obtain the plant from anyone, or you are not the originator. On the other hand if you have received the sport from TC and the plant being TCed was not yours, then you may not be the originator. Think this section through when filling out the form, simple logic should help you with the answer. Please, if you have any questions regarding any part of the form do not hesitate to e-mail me with your questions.

In registering hostas, classifying them for Hosta Shows and for those entering and judging them, I am finding that there are several problems with the determination of the margin colors, as well as the base color descriptions, that are submitted by the person registering the hosta, especially if the registrant is looking at yellowish green, greenish yellow, creamy yellow, or other similar compound color descriptions. To elaborate: 1) registrants most often have no reference chart to consult (i.e., what is the difference between greenish yellow and yellowish green) and 2) the margin color may change rather rapidly and it depends at what time they make their observations. If the greenish is very early and lasts only a couple of weeks, then turns to cream, then we should register it as white, if it turns to yellow, then yellow, or if to chartreuse, then green. In an effort to ease this dilemma, we will be providing at the Registrar's Web site a series of sample charts (coming soon), with codes to assess the accuracy of other codes, or of your computer/printer color indicators and to improve your registration information. More detailed RGB or Hex # color charts may be found at various Web sites, or by ordering the Royal Horticultural Society Colour Chart.

Brief Key to Descriptions: ONIR: O=originator, N=nominant (namer), I=introducer, R=registrant.

Flowers: Bloom periods are given in either start - peak - finish format or a more general period format. The general periods are as follows: Very early period: before June 1, average period: June 1 - July 15, summer period: July 15 to August 15, late period: August 15 to October 1, very late period: after October 1;

Bloom Period Codes: Ties the flowering of the cultivar to a "species scale". The registrant has provided the number code from the scale below for the start - peak - finish of the flowering period.

1	2	3	4	5	6	7	8	9
----- ----- ----- ----- ----- ----- ----- ----- -----

Forms: Registration forms are available from the registrar, or may be obtained on the Internet at: <http://www.hosta.org/> at: <http://hostalibrary.org/> or from the Registrar's website [www.hostaregistrar.org.](http://www.hostaregistrar.org/)

Plant Patents, Plant Breeder's Rights and Establishment: Principle 5 of the ICNCP states:

"This *Code* regulates the terminology to be used for distinguishable group of plants in cultivation and the names to be applied to individual distinguishable groups."

"Under some national and international legislation such as that providing for National Listing or Plant Breeders' Rights (Plant Variety Rights), names may be established for distinguishable groups of plants using terminology peculiar to such legislation. This *Code* does not regulate the use of such terminology or the formation of such names but recognizes that, under such legislation, these names take precedence over names formed under the provisions of this *Code*."

Article 28.2 of the *Code*: "the name of a cultivar accepted and published by a statutory plant registration authority, even if using alternative terminology must not be rejected under the provisions of this *Code*."

In keeping with this principle, included on page 21 is a table of hostas that have been processed under one of these pieces of legislation. The table also indicates which have already been registered. Those which have not been registered have been established and thus, those names although, not registered, are not available for use by any other person. Of note, of the 59 cultivars granted these other protections, 47 are already registered, thus most still feel the registration process is as valuable as the legal protections afforded by certain jurisdictions.

Thanks: The editing of W. George Schmid, Mark Zilis, C.H. Falstad, III and Warren Pollock is acknowledged and greatly appreciated.

Corrections: Preamble 9 of the 2004 edition of the International Code of Botanical Nomenclature states: The only proper reasons for changing a name of a plant are either a more profound knowledge of the facts resulting from adequate taxonomic study or the necessity of giving up a name that is contrary to the Rules of a Code. In this case, the name is not changed, but the spelling is corrected in this case to the form originally desired by the authors of the name. The original spelling "Pee Dee" could not be registered under a previous Code as explained later. The original name is acceptable under the new Code, as detailed study now shows. Article 32 declares that correcting the spelling of a cultivar epithet should be used with reserve, especially if the change affects the first syllable and above all the first letter of such an epithet. This is not the case in this correction.

Recently, a letter sent to the *THJ* editor referred to a caption in the story "The Best Gardens You'll Never See" in Volume 38, Number 2. That letter referred to a caption contained and also referenced a prior article by Warren Pollock where he discussed the "Peedee" hostas in "What's in a Name," Volume 37, Number 3, page 11, where Warren talks about why the "d" is lower-case.

Because of that letter, I as Registrar, and W. George Schmid, as Chairman of the AHS Nomenclature Committee began to refresh our recollection of the history involved in the registration of the "Peedee" hostas.

If you happen to have a copy of the original Silverbook (which was published in 1992, with all registrations from inception through 1991), you will see that from inception "Peedee" was spelled as Warren mentions. But this does not tell the whole tale. Further, I went back to the original registration forms and found that the first registered "Peedee" was *H. 'Peedee Elfin Bells'*.

When I was editor of the *Journal*, I also helped David Stevenson with the layout of the Registration Issues and the second "Silverbook" and I dusted off my old notes as I remembered asking David about this, as I pass through the Pee Dee (Little, Great and Lesser) River Basin of North and South Carolina on my way to Florida, and always get a kick out of the name, but wondered why Ursula had it as one word. You will note that I use it as two words with both in caps. If you Google "Peedee," or "PeeDee" it asks you if you meant "Pee Dee," and you will note that it lists many correct, historic, geographic, scientific, and other U.S. references to "Pee Dee" but also to "PeeDee."

2007 REGISTRATIONS

In response, David indicated to me at the time that, when the original submissions came in to Warren Pollock (who was then editor of the *Journal*) and Merv Eisel (who preceded David as registrar), Warren and Merv had made the decision, because under the 1980 International Code of Nomenclature for Cultivated Plants (“the Code”) no more than 3 words could constitute a cultivar name. In addition, by Code and in common English usage, capitals do not exist in the middle of a word so they made it “Peedee” (later Code issues also allow interspersed capitals). Thus, to prevent denying *H.* ‘Pee Dee Elfin Bells’ it became ‘Peedee Elfin Bells’. Merv had this “approved” by Ursula at that time, and thus he registered the name accordingly. This remained a consistent practice with David Stevenson following Merv’s example as to the Peedee usage.

In 1997, the issue arose anew when Jim Wilkins became registrar and revisited this issue. As a consequence, George did some considerable research on this River’s name. In short, George found that all versions are correct. Many native Carolinians use the old name, i.e., Peedee, which was the name of an Indian tribe in the area. That was the only way it was spelled in colonial times. The modern spelling on maps is Pee Dee, but many old-timers there refuse to use that “new-fangled spelling.” However, it was decided at that time, with all the new registrations that were coming in that the registrar would continue to use Peedee. The origin of the name goes back to Juan Pardo’s second expedition to South Carolina in the late 1560’s. He recorded the existence of a tribe called Vehidi (pronounced Ve-ee-dee) in their language with the V being an “explosive” sound. This may have been the way it sounded to the European settlers. Vehidi phonetically became Veedee (notice: one word) became Peedee or PeeDee, and later Pee Dee. Today the tribe is known as the Pee Dee. There is no one way to spell it. The various spellings constitute what we call synonyms in botany.

Modern spelling uses all of the existing ways of spelling the name: The United States Geological Survey and Corps of Engineers spell it the new way (Pee Dee) and most river system maps have it that way. Then again, some modern Carolinian agencies purposefully use the old spelling, but with the “Dee” capitalized, like the North Carolina Office of Environmental Education, which uses PeeDee as in “Yadkin-PeeDee. The basin’s Uwharrie Mountains are the remains of an ancient chain of volcanic islands that were pushed upwards during the collision of the African and North American continents.” The spelling PeeDee is also supported and used by the North Carolina Department of Environment and Natural Resources. Also, The Yadkin PeeDee River Basin Association (“YPDRBA”) uses PeeDee. It is THE coalition of point source dischargers in the Yadkin River basin. This coalition was formed to consolidate the stream monitoring that must occur in order to comply with NPDES permits. So there are plenty of important users of the version PeeDee and several scientific papers and books have been published using the PeeDee in their titles.

In modern spelling, the second D is always capitalized, space or no space, as in Pee Dee and PeeDee. Thus, as it was requested by the Registrant and is allowed under the current version of the Code, and appears the way the registrant wanted it to be from the beginning, accordingly, I have made the change to “PeeDee”, which will be reflected going forward beginning with the publication of this the 2007 Registration Issue, as under the Code official usages must be published to become effective.

1987 Registration: *H.* ‘Peedee Elfin Bells’. This name was registered correctly, but see discussion above. It is now registered as *H.* ‘PeeDee Elfin Bells’.

1987 Registration: *H.* ‘Peedee Gold Flash’. This name was registered correctly, but see discussion above. It is now registered as *H.* ‘PeeDee Gold Flash’.

1987 Registration: *H.* ‘Peedee Graymulkin’. This name was registered correctly, but see discussion above. It is now registered as *H.* ‘PeeDee Graymulkin’.

1989 Registration: *H.* ‘Peedee Treasure’. This name was registered correctly, but see discussion above. It is now registered as *H.* ‘PeeDee Treasure’.

1990 Registration: *H.* ‘Peedee Absinth’. This name was registered correctly, but see discussion above. It is now registered as *H.* ‘PeeDee Absinth’.

1990 Registration: *H.* ‘Peedee Spring Fever’. This name was registered correctly, but see discussion above. It is now registered as *H.* ‘PeeDee Spring Fever’.

1992 Registration: *H.* ‘Peedee Dew Catcher’. This name was registered correctly, but see discussion above. It is now registered as *H.* ‘PeeDee Dew Catcher’.

2007 REGISTRATIONS

1992 Registration: *H.* 'Peedee Granny Smith'. This name was registered correctly, but see discussion above. It is now registered as *H.* 'PeeDee Granny Smith'.

1992 Registration: *H.* 'Peedee Laughing River'. This name was registered correctly, but see discussion above. It is now registered as *H.* 'PeeDee Laughing River'.

1992 Registration: *H.* 'Peedee Picotee'. This name was registered correctly, but see discussion above. It is now registered as *H.* 'PeeDee Picotee'.

1996 Registration: *H.* 'Peedee Apollo'. This name was registered correctly, but see discussion above. It is now registered as *H.* 'PeeDee Apollo'.

2006 Registration: *H.* 'Gold Rags' This name was registered incorrectly. It should have been registered as *H.* 'Glad Rags'.

H. 'Agawa' V. Wade (ONIR)
Plant: 54 in. (137.2 cm) diameter; 38 in. (96.5 cm) high; mound-like; fast growth rate.
Leaf: 16 in. (40.6 cm) long; 9.5 in. (24.1 cm) wide; 13 to 15 vein prs.; med. blue-green; flat margin; glaucous bloom above and underneath; broadly ovate; cordate base; lightly cupped; moderately corrugated.
Scape: 34 to 40 in. (86.4 to 101.6 cm) long, green.
Flower: 2.25 in. (5.7 cm) long; near white; tubular; Bellville, OH; 6/25-7/5-7/15.
Seed: sets viable seeds; green seed pods.
Clump History: orig. seedling; 6 yrs old; Bellville, OH.
Notable Characteristics: compact form; good flower height; takes mostly sun conditions.

INTERNATIONAL REGISTRATION OF HOSTA CULTIVARS

The following is the *minimum* required for registration:

- This form with the front page completed in its entirety.
- One photographic print or slide of the clump, with leaf detail discernable.
- Written permission from the originator if other than the registrant.

The following is optional but strongly requested:

- Any information requested on the back side of the form now or as soon as available.
- A different photo showing leaf detail.
- A \$5 registration fee. Check payable to The American Hosta Society (unpaid fees will be paid by The American Hosta Society).

Forms, fee, photos, etc. should be mailed to: Hosta Registrar, **Kevin P. Walek, 9122 John Way, Fairfax Station, VA 22039-3042 or email to: ahsregistrar@aol.com.** Terms used on this form can be found in *The American Hosta Society Glossary of Terms*. Questions can be answered by calling 703-798-5501 (evenings and weekends) or emailing ahsregistrar@aol.com. **Please note:** Un-established cultivar names submitted for registration do not become established until they are published in *The Hosta Journal* accompanied by their description and thus could become established outside of registration prior to that publishing date. **Feel free to photocopy this form for additional copies and distribution or visit www.hostaregistrar.org**
