

The registration process is only as good as the people who register their plants, and the quality of the information that they provide. I want to thank all who have taken the time to make this an informative and educational effort. There are 156 new registrations for 2013; for a total of 5335 registered hostas.

The effort continues to be invigorated by the in depth research and knowledge of W. George Schmid, and Warren Pollock.

As was announced three years ago, the comprehensive index has become excessively long, due to the large number of recent registrations. Therefore, **the index will be published exclusively online.**

Name Reservation: The International Code of Nomenclature for Cultivated Plants ("ICNCP" or "Code") has no provision for name reservations and each plant society has developed its own policy. To alleviate any further confusion, the American Hosta Society ("AHS") has adopted a formal policy on name reservation.

New AHS Name Reservation Policy:

A hosta cultivar name can be reserved with the AHS Registrar. The reserved name does not require descriptive information, will be protected for a one time period of three years from date of receipt, and requires paying a \$10 reservation fee. The reserved name may not be displayed in gardens nor used in print before registration with the AHS and Registrar publication. A maximum of 6 cultivar name reservations may be held concurrently by a registrant.

If the name were established under the ways allowed under the Code, such as a Plant Patent, that would supersede any reservation. Thus, again a reservation is NOT a guarantee, simply a place holder until you get your paperwork in, and then hope that you are first with the paperwork and there is no Plant Patent or Plant Breeder's rights established. Further, you should note there are some other ways of establishing that could also supersede a reservation, but those are so detailed that they will be left to the operation of the Registrar and the Nomenclature Committee.

For example a nursery catalogue might be sufficient to establish a name such that no one else could register a plant using that name. The guidance that has been published which accompanies the Code states:

"The description can be brief but it is most useful if it makes clear how the new cultivar differs from others. Many cultivars are first described in nursery catalogues but magazines, newsletters and other publications are equally valid **as long as they are publicly distributed and generally available** (emphasis added). Where a catalogue is only available online effective publication can still be made by printing off at least two copies and lodging them with a designated library."

This is allowed but note there are two caveats, generally electronic catalogues themselves are insufficient to achieve establishment, and further, if electronically published, at least two ("hard") copies must be printed and lodged with a designated library. (Designated here means a regularly recognized horticultural library – usually one that maintains herbarium specimens.) Secondly, the key phrase above highlighted but bears repeating: **"as long as they are publicly distributed and generally available."** Some catalogues, especially those that go to thousands of people and to people beyond just the AHS roster would probably comply, but I am hard pressed to consider most hosta catalogues widespread, or generally available. Thus the need for the Registrar in consultation with the Nomenclature Committee is evident in borderline circumstances.

Data Base "Errors" (and their correction): Again, I encourage anyone finding what they believe to be errors to write me and let me

know so that I can research the matter and make appropriate changes to the record.

To clarify matters as many have asked, where it is a clear typographical error made by the registrar in recording the data, changes can be made with little effort. However, where the data was contained on the original registration form the registrar must first attempt to contact the original registrant to approve the changes. Thus, even though a change should be made as correct information is now known there may be reasons other than the registrar forgetting to make the correction as to why the change was not made, and in fact the registrar may be prohibited from making the changes. Nonetheless, I encourage you to bring any items that do not make sense to you to my attention.

Plant Patents, Plant Breeder's Rights and Establishment: Article 31.2 of the Code (8th Edition; 2009) under Article 31. Rejection of Names: "... the name of a cultivar accepted and published by a statutory plant registration authority, even if using alternative terminology must not be rejected under the provisions of this Code."

In keeping with this provision, included on pages 25 to 26 is a table of hostas that have been processed under one of these legislative authorities. The table also indicates those which have already been registered. Those which have not been registered have been established and thus, those names although, not registered, are not available for use by any other person. Of note, of the 114 cultivars granted these other protections (of which 4 have since expired), 87 are already registered. Thus, it is reassuring that most still feel the registration process is as valuable, if not more so, as the legal protections afforded by certain jurisdictions.

Plant Patent Applied For ("PPAF"): The U.S. Patent Office now only publishes patent applications if the applicants request that the filings be published. Otherwise applications are not available until the patents are granted, when patent numbers with dates are issued. On occasion people registering hostas intended to file for plant patents, but then did not. This has resulted in the Hosta Registry incorrectly representing some hostas as PPAF. Thus starting in 2010, the DATES of the actual U.S. patent application filings must be supplied to the registrar by the hosta registrants for their plants to be listed as PPAF. Note that PPAF does not necessarily mean a U.S. plant patent is forthcoming. The Patent Office may determine the application not patentable or the application may be abandoned.

Controversy Regarding Certain Registered Hostas: See "Origin of Paul Aden's Registrations: Report #2" which follows.

Origin of Paul Aden's Registrations Report #2

By AHS Cultivar Origination Commission

In April 2012, The American Hosta Society president appointed the AHS Cultivar Origination Commission with the mission:

Investigate origins of Paul Aden's registrations and report findings to the International Registrar for the Genus Hosta for modifying The Hosta Registry.

The Commission's first report was published in 2012 issue of *The Online Hosta Journal* and reprinted in *Registration 2012* issue of *The Hosta Journal* (Vol. 44, No. R, p. 5). The late Florence N. Shaw was credited as originator of 16 hostas, and Kevin C. Vaughn as originator of 8 hostas, registered by the late Paul Aden. Examples are:

H. 'Blue Angel' (F. Shaw - 1986),
H. 'Blue Umbrellas' (F. Shaw - 1978),
H. 'Fragrant Blue' (K. Vaughn - 1988),
H. 'Fragrant Bouquet' (K. Vaughn - 1982),
H. 'Love Pat' (F. Shaw - 1978),
H. 'So Sweet' (K. Vaughn - 1986),
H. 'Sum and Substance' (F. Shaw - 1980) and
H. 'Zounds' (F. Shaw - 1978).

Parentage of Mrs. Shaw's and Dr. Vaughn's hostas was not addressed in the 2012 report. Unfortunately breeding records are lost and the correct pod and pollen parents cannot be identified. Accordingly, the Commission now has recommended in The Hosta Registry:

Parentage of Shaw's and Vaughn's originations be listed as Selected seedling. Parentages in Aden's registrations are to be deleted.

The 2012 report credited "Asami" as originator of *H.* 'On Stage', with a note that 'On Stage' is the same hosta as 'Chōkō Nishiki'. Originator of 'Chōkō Nishiki' was possibly thought to be Mr. Hisatoyo Asami of Tokyo, a long-time member of The American Hosta Society. An inquiry to Mr. Hisatoyo Asami determined that though he purchased the hosta around 1980, he was not its discoverer or originator. Furthermore, Mr. Asami does not know who named it. Accordingly, the Commission now has recommended in The Hosta Registry:

Originator of 'On Stage' be listed as Unknown.

The Commission continued its investigations of hostas registered by and for Paul Aden in 2013. Findings and recommendations are reported here.

The Hosta Registry lists three (3) Tardianas that Aden registered for the late Eric Smith: *H.* 'Blue Moon' (1976), *H.* 'Dorset Blue' (1977), and *H.* 'Harmony' (1976). In fact, Aden registered five (5) Tardianas for Smith. *H.* 'Hadspen Blue' and 'Hadspen Heron' were incorrectly listed in The Hosta Registry with Peter Ruh as registrant. Paul Aden was the actual registrant. (See 'Hadspen Blue' and 'Hadspen Heron' in Mark Zilis's *The Hostapedia*.) Peter Ruh was not involved with hosta registrations in 1976 and 1977. Accordingly, the Commission recommended in The Hosta Registry:

Registrant of 'Hadspen Blue' (1977) and 'Hadspen Heron' (1977) be corrected and P. Aden be cited as registrant.

Interestingly, the registrations of these Tardianas do not credit Eric Smith as originator. The Commission believed this was an

opportune time for correction, and, accordingly, recommended in The Hosta Registry:

E. Smith be recognized as originator of 'Blue Moon', 'Dorset Blue', 'Hadspen Blue', 'Hadspen Heron', and 'Harmony' in their registrations.

Many Aden registrations have parentage with Aden numbered names, like Aden 365 and [*H.* 'Aden 81-B1' × *H.* 'Aden 83-B4']. They have no physical reality and should be deleted and replaced with Unknown.

On the other hand, some registrations have parentage with proper cultivar and species names. Examples are:

[*H.* 'Blue Tiers' × *H.* 'Blue Angel'] for *H.* 'Big Mama',
 [Hybrid of *H.* Tardiana Group] for *H.* 'Blessings',
 [Sport of *H.* Amy Aden] for *H.* 'Blonde Elf',
 [Hybrid of *H.* 'Tokudama'] for *H.* 'Blue Cadet' and
 [Hybrid of *H.* *sieboldiana*] for *H.* 'Blue Mammoth'.

Likely, some of these parentages are not correct, e.g., 'Big Mama', 'Blessings', and 'Blue Cadet'. Still, they have historical significance and should be retained. Accordingly, the Commission recommended in The Hosta Registry:

Except for hostas credited with Shaw and Vaughn as originations, Aden registrations not having proper cultivar or species names for parentage be listed as Parentage Unknown.

Also, the Commission recommended in The Hosta Registry:

Original registration years of Aden registrations be retained, with mention of alteration year.

Nineteen (19) hostas have "Abba" in their cultivar names. This was Paul Aden's personal identifier and apparently means "father"; in other words, a title of honor. Nine (9) "Abba"-named cultivars were registered by Aden in 1990 and 10 were registered for Aden by Mark Zilis in 2010. The Commission concluded that all "Abba"-named hostas should be credited to Paul Aden. Accordingly, the Commission recommended in The Hosta Registry:

P. Aden be credited as originator of "Abba"-hostas registered in 1990.

P. Aden be retained as originator of "Abba"-hostas registered in 2010.

Following are "Abba"-hostas with recommended parentage. Those with + already were registered with P. Aden as originator.

'Abba Alive'	Unknown
'Abba Aloft'	Sport of <i>H.</i> 'Sun Power'
'Abba at Large'	Sport of <i>H.</i> 'Sun Power'
'Abba Blue Plus'	Unknown
+ 'Abba Diane Reeck'	Unknown
'Abba Double Header'	Unknown
'Abba Fit'	Unknown
+ 'Abba Flower Mound'	Unknown
+ 'Abba Fragrant Backscratcher'	Unknown
+ 'Abba Fragrant Cloud'	Unknown
+ 'Abba Irresistible'	Unknown
'Abba Little Showoff'	Unknown
'Abba Nova'	Unknown
+ 'Abba Ready'	Sport of <i>H.</i> 'Invincible'
+ 'Abba Rough'	Hybrid of <i>H.</i> 'Tokudama'
+ 'Abba Soul Mate'	Sport of <i>H.</i> 'Halcyon'
'Abba Spellbinder'	Unknown

‘Abba Tops’	Unknown
+ ‘Abba Windows’	Sport of <i>H.</i> ‘Sun Power’

Of the more than 100 remaining Paul Aden-registrations in The Hosta Registry, one thing seems certain: *many did not originate with Paul*. Likely originators could be Florence Shaw, Kevin Vaughn, Cynthia and Chet Tompkins, and Eric Smith, the famous English plantsman. Of course, some likely could be Aden’s own creations. Guesses of possible originators abounded, but there was a paucity of *reliable information*. *Conclusive evidence rarely was available*. Thus, additional recommendations were sparse.

These recommendations in the Hosta Registry were made by the Commission:

P. Aden be credited as originator of *H.* ‘Shade Fanfare’. It is a sport of ‘Flamboyant’, found in tissue culture.

Chet (Ch.) Tompkins be credited as originator of *H.* ‘Flamboyant’ and *H.* ‘Floradora’. Parentage of both is Unknown.

Though it is not an Aden registration, *H.* ‘Antioch’, registered by Peter Ruh and Paul Hofer, was included in the Commission’s discussion. Pete Ruh has determined that Cynthia Tompkins originated this hosta; see information in *The Hostapedia*, p. 76. Accordingly, the Commission recommended in The Hosta Registry:

Cynthia (Cy.) Tompkins be credited as originator of *H.* ‘Antioch’. Parentage is Unknown. P. Ruh and P. Hofer remain credited as nominants and registrants.

Having completed its mission, the Commission submitted this final report to the Hosta Registrar on October 8, 2013.

H. '1st and Ten' D. & M. Beilstein (ONIR)
Plant: 50 in. (127 cm) diameter; 32 in. (81.3 cm) high; upright; medium growth rate.
Leaf: 15 in. (38.1 cm) long; 11.5 in. (29.2 cm) wide; 18 vein pairs, medium blue-green, moderately rippled, glaucous bloom on top and underneath, broadly ovate with a cordate base, moderately folded, moderately wavy, lightly corrugated.
Scape: 55 in. (139.7 cm) tall, green.
Flower: medium lavender, tubular, Mansfield, OH, 7/3-7/25.
Seed: sets viable seed, seed pod green.
Clump History: original seedling, 6 yrs old, Mansfield, OH.
Notable Characteristics: big, tall and leaves point out from the clump, blue color, deep veins and broadly ovate leaf shape.
 [H. 'Brutus' × sdlg BEV3-MOM]

H. 'Alphabet Soup' M. Gilligan (ONIR)
Plant: 25 in. (63.5 cm) diameter; 29 in. (73.7 cm) high; upright; slow growth rate.
Leaf: 8 in. (20.3 cm) long; 8 in. (20.3 cm) wide, 12 to 16 vein pairs, light green, slightly rippled glaucous bloom on top and underneath, nearly round, cordate base, lightly cupped, petiole just above leaves.
Scape: 30 to 36 in. (76.2 to 91.4 cm) tall, green.
Flower: 1.5 in. (3.8 cm) long, near white, tubular, Winchester (New Zealand), June 1 to July 15.
Seed: sets seeds, viability is unknown, seed pod green.
Clump History: original seedling, 10 yrs old, Winchester (New Zealand).
Notable Characteristics: initials in corrugation like soup pasta.
 [H. 'Bright Lights' × open pollinated]

H. 'Andy Murray' R. Solberg (R), BHHS (ONI)
Plant: 39 in. (91.4 cm) diameter; 18 in. (45.7 cm) high, mound like, medium growth rate.
Leaf: 12 in. (30.5 cm) long; 8 in. (20.3 cm) wide; 11 to 12 vein pairs, medium blue-green; 1 to 1.5 in. (2.5 to 3.8 cm) slightly rippled, yellow and white margin, glaucous bloom on top and underneath, broadly ovate, cordate base, lighted folded, moderately wavy.
Scape: 36 to 40 in. 99.4 to 101.6 cm tall; blue-green.
Flower: pale lavender, tubular, Franklinton, NC; July 15 to Aug. 15.
Seed: sets viable seed, seed pod green.
Clump History: original seedling, 3 yrs old; obtained from the originator; Franklinton, NC.
Notable Characteristics: variegated form of plant know as Longianablue with a border of yellow and white in between.
 [streaked F1 sdlg of H. 'Big Boy' × sdlg called Longiana]

H. 'ASPIRE' B. Silvers (ONIR)
Plant: 42 in. (106.7 cm) diameter; 17 in. (43.2 cm) high; mound like; medium growth rate.
Leaf: 7 in. (17.8 cm) long; 4 in. (10.2 cm) wide; creamy white; .25 to .5 in. (.6 to 1.3 cm) wide, flat, slightly blue-green margin. slightly shiny on top, dull underneath, broadly ovate with a rounded base.
Scape: 20 to 30 in. (50.8 to 76.2 cm) tall.
Flower: Cisco, GA; June 1 to July 15.
Clump History: original sport; 2 yrs. Cisco, GA
 [Sport of H. 'Allen C. Haskell']

H. 'Baltimore Blues' R. A. Smith (ONIR)
Plant: 38 in. (96.5 cm) diameter; 18 in. (45.7 cm) high; mound like; fast growth rate.
Leaf: 8 in. (20.3 cm) long; 7 in. (17.8 cm) wide; 10 vein pairs, intensely blue-green; flat; glaucous bloom on top and underneath; nearly round with a cordate base; lightly cupped, lightly folded; very thick petiole.
Scape: 23 to 25 in. (58.4 to 63.5 cm) tall, blue-green.
Flower: 2.25 in. (5.7 cm) long, pale lavender, pale lavender center, white margins, tubular, Severn, MD, 7/24-8/5-8/21.

Seed: sets viable seed; seed pod green.
Clump History: original seedling, 7 yrs old, Severn, MD.
Notable Characteristics: displays a unique blue color and has a wave in the center of each leaf
 [H. 'Fragrant Blue' × unknown]
Seasonal Color: late season dark green

H. 'Barndance' L. Port (ONIR)
Plant: 60 in. (152.4 cm) diameter; 26 in. (66 cm) high; upright; medium growth rate.
Leaf: 11 in. (27.9 cm) long; 9 in. (22.9 cm) wide; golden yellow; slightly rippled margin, dull on top, glaucous bloom underneath; broadly ovate with a cordate base; wavy.
Scape: 28 to 30 in. (71.1 to 76.2 cm) tall; green.
Flower: pale lavender; tubular, Morrison, IL, July 15 to Aug. 15
Seed: sets viable seed; seed pod green.
Clump History: original seedling, 9 yrs old, Morrison, IL
Notable Characteristics: strong growing gold with mush leaf motion, deeply impressed veins.
 [H. 'Lime Piecrust' streaked × unknown]
Seasonal Color: lime green then golden yellow with green veins.

H. 'Bellevue' D. Van Eechaute (ONIR)
Plant: 38 in. (96.5 cm) diameter; 18.375 in. (46.7 cm) high; upright fast growth rate.
Leaf: 11.5 in. (29.2 cm) long; 4.675 in. (11.9 cm) wide; 9 to 11 vein pairs; dark green; slightly rippled; slightly shiny on top; glaucous bloom underneath; lance with a tapered base; moderately wavy; petiole red purple.
Scape: 21 to 28 in. (53.3 to 71.1 cm) tall; green with red speckles
Flower: medium lavender; tubular; Astene-Deinze (Belgium); 7/18-8/2-8/28.
Seed: sets viable seed; dark green.
Clump History: original seedling; 5 yrs old; Astene-Deinze (Belgium).
Notable Characteristics: big hosta with red petioles, pleasing form.
 [H. 'Missouri River' × H. 'Dewed Steel']

H. 'Benji's Gold' A. Blake (ONIR)
Plant: 25 in. (63.5 cm) diameter; 15 in. (38.1 cm) high; upright; medium growth rate.
Leaf: 8 in. (20.3 cm) long; 4 in. (10.2 cm) wide; 8 to 10 vein pairs; greenish yellow; flat margin, dull on top; glaucous bloom underneath; ovate with a tapered base, flat, petiole red purple at base with purple spotting up petiole.
Scape: purple
Flower: near white; tubular, Lower Barrington (Australia); Jan.-Feb.
Seed: seed set unknown.
Clump History: original seedling; 4 yrs old; Lower Barrington (Australia).
Notable Characteristics: purple flower scapes on a gold plant, red purple dotting on petioles.
 [H. 'Midas Touch' × unknown]
Seasonal Color: turns to a golden yellow by midsummer.

H. 'Big Point' L. Powell (ONIR)
Plant: 30 in. (76.2 cm) diameter; 18 in. (45.7 cm) high.
Leaf: 11.5 in. (29.2 cm) long; 6.5 in. (16.5 cm) wide; 6 vein pairs; medium green; .875 in. (2.2 cm) wide, flat, golden yellow margin; slightly shiny on top, dull underneath, flat, ovate; lightly corrugated; petiole slightly convex.
Scape: 28 in. (71.1 cm) tall.
Flower: 1 in. (2.5 cm) long; pale lavender; bell; Princeton, NC; 6/ 1-7/15.
Seed: sets viable seed; seed pod green.
Clump History: original sport; 5 yrs old; Princeton, NC.
 [Sport of H. 'Brigadier']

H. 'Blue Magic' R. & M. Ford (ONIR)
Plant: 29.5 in. (75 cm) diameter; 9.8 in. (25 cm) high; mound like; medium growth rate.
Leaf: 10.2 in. (26 cm) long; 7.1 in. (18 cm) wide; 12 vein pairs; medium blue-green streaked yellow; slightly rippled; slightly shiny on top, dull underneath; broadly ovate with a cordate base; lightly wavy, moderately flat; petiole broad channeled.
Scape: 27.6 to 31.5 in. (70 to 80 cm) tall; medium blue-green.
Flower: 2 in. (5.1 cm) long; pale lavender; light striping with translucent margins; bell, Ipswich (England); 7/15-7/23-8/5.
Seed: sets viable seed; seed pod light green.
Clump History: first generation division; 3 yrs old, Ipswich (England).
Notable Characteristics: leaf color and very variable leaf streaking. [Sport of *H. 'Blue Angel'*]

H. 'Bluer than Blue' G. R. Goodwin (ONIR)
Plant: 36 in. (91.4 cm) diameter; 18 in. (45.7 cm) high; upright to mound like; slow growth rate.
Leaf: 9 in. (22.9 cm) long; 9 in. (22.9 cm) wide, 15 to 16 vein pairs; intensely blue-green; flat; dull on top and underneath; nearly round with a cordate base; moderately cupped, lightly twisted, moderately folded, lightly wavy; deeply corrugated.
Scape: 30 to 35 in. (76.2 to 88.9 cm) tall; blue-green.
Flower: 2 in. (5.1 cm) long; pure white; tubular; Zionsville, IN; 6/10-6/25-7/5.
Seed: sets viable seed; seed pod blue-green.
Clump History: original seedling; 8 yrs old; Zionsville, IN.
Notable Characteristics: powder blue that is a stronger, longer lasting coloration than the pod parent. [*H. 'Blue Betty Lou'* × unknown]

H. 'Bluetopia' M. & J. Carlson (ONIR)
Plant: 45 in. (114.3 cm) diameter; 20 in. (50.8 cm) high; mound like; medium growth rate.
Leaf: 10 in. (25.4 cm) long; 6.25 in. (15.9 cm) wide; 14 vein pairs; intensely blue-green; slightly rippled; glaucous bloom on top and underneath; broadly ovate with a cordate base; lightly cupped, moderately wavy.
Scape: 19 to 23 in. (48.3 to 58.4 cm) tall; green.
Flower: 1.5 in. (3.8 cm) long; pale purple; interior striping; tubular; Evansville, MN; 7/31-8/8-8/20.
Seed: sets viable seed; seed pod blue.
Clump History: original seedling; 9 yrs old; Evansville, MN.
Notable Characteristics: intense blue holds through the entire season, wavy edges [*H. 'Urajiro Hachijo'* × *H. 'Potomac Pride'*]

H. 'Brentwood Blues' S. Watson (ONIR)
Plant: 20 in. (50.8 cm) diameter; 8 in. (20.3 cm) high; mound like; medium growth rate.
Leaf: 4.5 in. (11.4 cm) long; 2.5 in. (6.4 cm) wide; 6 to 7 vein pairs; medium blue-green; .125 to .25 in. (.3 to .5 cm) wide, flat, white margin; glaucous bloom on top and underneath ovate with a rounded base; lightly folded, lightly wavy; petiole blue-green.
Scape: 12 to 14 in. (30.5 to 35.6 cm) tall; green.
Flower: medium lavender; tubular; Franklinton, NC; July 15 to Aug. 15.
Seed: seed set unknown.
Clump History: original seedling; 4 yrs old; Franklinton, NC.
Notable Characteristics: small blue-green leaves with pure white margins in a small clump. [Sport of *H. 'Rhythm and Blues'*]

H. 'Broadway' D. Van Eechaute (ONIR)
Plant: 36.625 in. (93 cm) diameter; 16.75 in. (42.5 cm) high; mound like; medium growth rate.

Leaf: 9.75 in. (24.8 cm) long; 6.375 in. (16.2 cm) wide; 10 to 11 vein pairs, dark green; 1.5 in. (3.8 cm) wide, flat, creamy white Margin; slightly shiny on top, slightly shiny underneath; broadly ovate with a flat base; moderately flat.
Scape: 19.25 to 27.5 in. (49 to 70 cm) tall; green.
Flower: 1.675 in. (4.3 cm) long; pale lavender; tubular; Astene-Deinze (Belgium); 6/16-6/27-7/14.
Seed: sets seeds, viability is unknown; seed pod green.
Clump History: original sport; 4 yrs old; Astene-Deinze (Belgium).
Notable Characteristics: very broad cream white border. [Sport of *H. 'Border Street'*]

H. 'Brocade' G. R. Goodwin (ONIR)
Plant: 24 in. (61 cm) diameter; 10 in. (25.4 cm) high; mound like; medium growth rate.
Leaf: 8 in. (20.3 cm) long; 5 in. (12.7 cm) wide; 9 vein count; greenish yellow; heavy ripples; very shiny on top, slightly shiny underneath; broadly ovate with a rounded base; lightly cupped, lightly twisted, lightly folded, deeply wavy, lightly corrugated, lightly flat.
Scape: 15 to 20 in. (38.1 to 50.8 cm) tall; green.
Flower: 2 in. (5.1 cm) long, near white; light lavender petal center; bell; Zionsville, IN; 9/10-9/15-9/30.
Seed: does not set viable seed; seed pod green.
Clump History: original seedling; 12 yrs old; Zionsville, IN.
Notable Characteristics: unique yellow coloration with a ruffle at top of petiole. [*H. 'Grand Slam'* × unknown]

H. 'Brodie's Bonanza' G. R. Goodwin (ONIR)
Plant: 24 in. (61 cm) diameter; 8 in. (20.3 cm) high; mound like; medium growth rate.
Leaf: 6 in. (15.2 cm) long; 4 in. (10.2 cm) wide; 7 vein pairs; light green; slightly rippled; very shiny on top, slightly shiny underneath; broadly ovate with a rounded base; moderately cupped, moderately twisted, moderately folded, deeply wavy, light corrugated, lightly flat.
Scape: 18 to 24 in. (45.7 to 61 cm) tall; green to blue.
Flower: 2 in. (5.1 cm) long; bluish cast; bell; Zionsville, IN; 9/1-9/15-9/30.
Seed: sets viable seed; seed pod green.
Clump History: original seedling; 11 yrs old; Zionsville, IN.
Notable Characteristics: interesting seasonal color change, interesting flower scape arrangement. [*H. 'Grand Slam'* × unknown]
Seasonal Color: light green to greenish yellow.

H. 'Burgundy Bermudas' G. R. Goodwin (ONIR)
Plant: 24 in. (61 cm) diameter; 12 in. (30.5 cm) high; upright; medium growth rate.
Leaf: 6 in. (15.2 cm) long; 4 in. (10.2 cm) wide; 6 vein pairs; light green; slightly rippled margin; very shiny on top, slightly shiny underneath; ovate with a rounded base; lightly cupped, lightly twisted, lightly folded, moderately wavy, lightly corrugated, lightly flat.
Scape: 24 to 30 in. (61 to 76.2 cm) tall; reddish purple.
Flower: 2 in. (5.1 cm) long; purple; bell; Zionsville, IN; 8/15-8/30-9/15.
Seed: sets viable seed; seed pod green.
Clump History: original seedling; 12 yrs old; Zionsville, IN.
Notable Characteristics: red petiole, interesting solid reddish coloration. [*H. rupifraga* × unknown]

H. 'Candy Kisses' R. Solberg (O), G. Meyer (N), Shades of Green HSofMn (IR)
Plant: 24 in. (61 cm) diameter; 12 in. (30.5 cm) high; mound like; medium growth rate.

Leaf: 7.25 in. (18.4 cm) long; 5 in. (12.7 cm) wide; 7 vein pairs; medium green; heavy ripples; very shiny on top; glaucous bloom underneath; broadly ovate with a rounded; dusty purple to three-quarters of length.

Scape: 15 to 22 in. (38.1 to 55.9 cm) tall; dusty green.

Corrections and Additions:

H. 'Chōkō Nishiki' (2012) – This was registered with the following provenance and typographic error: Asami (ON), Goetmba Nursery (I), M. Zilis, AHS (R). Further research has disclosed that the provenance should be: unknown (ON), Gotemba Nursery (I), M. Zilis, AHS (R).

H. 'Firm Line' (2012) – Due to a typographical error on the part of the registrar this was incorrectly registered as *H. 'Firm Line'* and should have been *H. 'Firn Line'*. Further, as it was published, albeit incorrectly, and attached to a description, the registrar formally announces that the incorrect name is also removed from possible future use.

H. 'Garnet Spires' (2005) – This was registered as having the following parentage which was incorrect: [*H. 'Liberty Bell'* × (*H. 'Urajiro Hachijo'* × *H. pycnophylla*) × *H. longipes* × *H. kikutii*]

The parentage for this cultivar should have read: [(*H. 'Liberty Bell'* × (*H. 'Urajiro Hachijo'* × *H. pycnophylla*)) × *H. 'Mikawa-no-Yuki'*]

H. 'Peek-a-boo Purple' (2011) – This was registered as having the following parentage which was incorrect: [(*H. 'Liberty Bell'* × (*H. 'Urajiro Hachijo'* × *H. pycnophylla*) × *H. 'Ebony Skies'*) × *H. 'Venetian Blue'*]

The parentage for this cultivar should have read: [(*H. 'Liberty Bell'* × (*H. 'Urajiro Hachijo'* × *H. pycnophylla*)) × *H. 'Ebony Spires'*] × *H. 'Venetian Blue'*]

H. 'September Morn' (2012) – Due to a typographical error on the part of the registrar this was incorrectly registered as *H. 'September Morn'* and should have been *H. 'September Moon'*. Further, as it was published, albeit incorrectly, and attached to a description, the registrar formally announces that the incorrect name is also removed from possible future use.

H. 'University Dubuque Spartans' (2011) – This was registered with the registrar transposing the words in the name and should have been *H. 'Dubuque University Spartans'*.

H. 'Some Like it Hot' (2010) – was registered with description in Registrations 2010. After publication it was realized that the cultivar name *H. 'Some Like it Hot'* was too similar to *H. 'Sum Like It Hot'* (2005). Accordingly, the name was changed to *H. 'Happy Birthday, Mr President'*. In review this revision was not published in subsequent editions and, thus, is published herein. Also note that under the ICNCP there should not be a full stop (period) after Mr in cultivar names.

H. 'Lady Guinevere' (2005) It should be noted that although registered as *H. 'Lady Guinevere'*, it is spelled *H. 'Lady Guineverre'* on the patent.

H. 'Giantland Sunny Mouse Ears' (2011) credits were incorrectly reported and should have been T. Meyer & J. Miller (ON), M. Zilis (IR).

H. 'Giantland Mouse Cheese' (2011) credits were incorrectly reported and should have been J. Miller & T. Meyer (ON), M. Zilis (IR).

INTERNATIONAL REGISTRATION OF HOSTA CULTIVARS

The following is the *minimum* required for registration:

- This form with the bold-faced items completed in their entirety.
- One photographic (digital) print or slide of the clump, with leaf detail discernible.
- Written permission from the originator if other than the registrant.
- A \$5 registration fee. Check payable to The American Hosta Society.

The following is optional but strongly requested:

- A different photo showing leaf detail.
- A different photo showing flower detail.

Forms, fee, photos, etc. should be mailed to: Hosta Registrar, **Kevin P. Walek, 102 Manahoac Court, Lake Frederick, VA 22630-2097** or email to: **ahsregistrar@aol.com**. Terms used on this form can be found in *The American Hosta Society Glossary of Terms*. Questions can be answered by calling 540-252-2769 (evenings and weekends) or emailing **ahsregistrar@aol.com**. **Please note:** Un-established cultivar names submitted for registration do not become established until they are published in *The Hosta Journal* accompanied by their description and thus could become established outside of registration prior to that publishing date. **Feel free to photocopy this form for additional copies and distribution or visit www.hostaregistrar.org**

Registrations received by **November 1** will be included for that year's registration publication.
