

2025 Registrations

The due date for registration submissions is December 1!

106 new registrations were added in 2025, for a total of 6,936 registered hostas.

The cutoff date for submission of registration materials is December 1st.

There are **no fees** for the first ten (10) registrations per calendar year when registrants use the online registration tool at <https://www.hostaregistrar.org/registration>.

A \$10 fee IS required for each registration beyond ten.

For those who cannot register online, the registrar provides registration completion for a fee of \$25 per cultivar. Use the new “worksheet” to gather and submit your registration details.

NOTE: **None** of the old registration “forms” are acceptable for use after January 1, 2022.

Respectfully submitted,

Gayle Hartley Alley

International Registrar for the Genus *Hosta*

33001 E 155th Street

Pleasant Hill, MO 64080-9365

(816) 697-2007 or (816) 914-3220

International Code of Nomenclature for Cultivated Plants (ICNCP) Ninth Edition

The *ICNCP* is the official publication incorporating the Rules and Recommendations for naming plants in cultivation. The Ninth Edition of the *ICNCP* was published by the International Society for Horticultural Science (ISHS) in June 2016. Hereafter, the *ICNCP* will be referred to simply as “the *Code*.”

Registration Guidelines

A pdf copy of the “Registrations Guidelines” document is available at <https://www.hostaregistrar.org/registration>

Name Release Forms

Per the *Code*, permission must be granted for a person’s name to be used as the registered name of a cultivar. Permission forms with instructions for their use are included in the “Registration Guidelines” (see above).

Photograph Requirements

All registrations now require the submission of digital photographs. With registration photos appearing online, it is important to portray your cultivar’s noteworthy feature(s). For example, if red blushing leaves make your hosta unique – provide photos that adequately showcase this characteristic. Complete photograph requirements are included in the “Registration Guidelines” document (see above).

Registration Errors

Clear typographical and/or data entry errors are easily corrected by updating the database information and publishing those corrections within this document.

Not so straightforward, are instances where the published data accurately reflects the registrant’s information at the time the registration was approved and published, yet later proves to be misleading or outright erroneous. In these cases, **the registrant must approve any changes.**

In cases where the original registrant is not available and obvious errors are noted, we strive to work with what we have as best we can. An example would be the registration of *H. ‘Love Pat’* that has been discussed in depth, yet still remains as originally registered. To allow the AHS Show Classification team to update and clarify their classification listings, the registrar’s office now sanctions the use of the following materials:

- *Mark Zilis’ Field Guide to Hostas* by Mark R. Zilis, 2014 (Q & Z Nursery, Inc. Rochelle, IL)
- *The Hostapedia An Encyclopedia of Hostas* by Mark R. Zilis, 2009 (Q & Z Nursery, Inc. Rochelle, IL)

The official registration of hosta cultivars continues to be per the printed *Registrations* issue published each year. We acknowledge that official registrations are a mere “snapshot in time” providing only static details. Registration data is gathered at a single geographic location and the state of maturity will vary from quite young to fully mature. Thus, original data may fall short of supplying complete, real-life details. When you have need for more information than what is contained in this document, you will find relevant, accurate, and interesting information in the reference materials listed above.

Symbol Usage in Parentage Descriptions

Parentheses are commonly used within each parentage description. To assist with more complicated crosses, the use of brackets and braces has been added. When using brackets and braces to describe parentage, the order of precedence is: parentheses () occur first, followed by brackets [] and then braces { }. Any number of these symbols can be used consecutively in a parentage equation depending on the complexity of the hybridization. Additionally, the mathematical × symbol is now used to indicate each cross between pod and pollen parents.

Typographer’s Quotation Symbols

Introduced in 2017 is the use of proper quotation symbols instead of straight quotes. Straight quotes are left over from the age of typewriters when using one key for two different marks helped save space on a keyboard. Thanks to modern word processing features it is relatively easy to replace the old “dumb quotes” with proper typographer’s “smart quotes.” The prime symbol, which looks like a dumb quote, is still used for denoting measurements such as feet and inches (5’2”).

Rounding of Dimensions

All registration dimensions are rounded to the nearest tenth of an inch (English) or tenth of a centimeter (metric). Rounding dimensions to the nearest tenth means the published dimension will always be within .05 of the original before it was rounded. English dimensions submitted as fractions are converted to their decimal equivalent prior to being recorded in the database, and prior to rounding. The example below illustrates the rounding policy.

A registrant submits a leaf size of 2¼" × 5/8". The decimal equivalent 2.25" × .625" is entered into the database. After rounding, the published size is 2.3" × .6". The first rounded dimension is only .05" different from the original, and the second is only .025" different. Both are insignificant, even in the realm of miniature leaf sizes.

All conversions from metric to English (or English to metric), are done before any rounding occurs.

A registration that submits metric dimensions is converted first to English, then rounded to the nearest tenth of an inch. Thus, a metric dimension of 4.75cm × 3.65cm, is first converted to English (1.870" × 1.437") and then rounded to be 1.9" × 1.4".

Cultivar Name Establishment

To establish a cultivar name, the *Code* calls for registrations to appear in a suitable dated publication that is made publicly available. Thus, epithets that have not been published per this document are NOT guaranteed to be available for registration. Examples of how a name can be established outside of registration are: 1) if it has been listed in a nursery catalogue, 2) sold by the originator online under the name in question, or 3) a Plant Patent or Plant Breeders' Rights has been issued. Any of these scenarios might be sufficient to establish a name such that no one else can register a hosta using that name.

AHS Name Reservation Policy

As the *Code* has no provision for name reservations, each plant society develops its own policies. The American Hosta Society (AHS) states its Name Reservation policy as follows. "A cultivar name is reserved through the AHS Registrar. Reserved names do not require descriptive information or photographs and will be protected for a one time period of three (3) years. A maximum of 10 reserved names may be held concurrently by any one registrant." Similar to the section titled "Cultivar Name Establishment," a reservation is NOT a guarantee, it is a place holder that limits the ability for another person to register a plant using your reserved name. This protection does not extend into the three areas where names may be established outside of registration.

Flowering Periods

Flowering periods may be entered using the codes per Key A (see instruction page of registration form) or using a "start-peak-finish" format (both options are available). If both types are entered, the more accurate "start-peak-finish" information will appear in the formal registration.

Clump Sizes

There have been multiple changes in the registration form and the information required to adequately describe plant size. An option to indicate a general size description (miniature, small, medium, large and giant) was allowed at one point early on. After input and discussion, this option was discontinued in preference for utilizing dimensional measurements to indicate a plant's width and height. This will remain standard policy, with the understanding that dimensions reflect clump size at the age and location recorded in each registration.

Color Selection for Leaf and Margins

Commentary upon determining accurate margin or leaf colors was published in the *Registrations 2008* and *2009* issues. While no color charts have been provided online, we recommend using charts provided by the Royal Horticultural Society when concerns about color arise. In some registrations, leaf colors contain references to the RHS Colour Charts in parentheses following the color descriptive text. See the 2021 registration of *H. 'Memphis Blue'* for an example where "...moderate greenish blue (122A RHS Chart)" appears within the Leaf details.

Indicating Ploidy in Registrations

A comprehensive discussion regarding ploidy was printed in the *Registrations 2009* thru *2011* issues. Current policy prohibits the inclusion of ploidy terminology within registrations unless scientifically verified.

Cumulative Index to Hosta Registrations

The *Cumulative Index* of registered hostas is now provided as a stand-alone document and can be found at https://www.hostaregistrar.org/annual_registration_booklets. Commencing with the 2016 index, each registration references the year it was registered (instead of the previous practice of listing *THJ* Volume and Registration Issue). Additionally, each entry now references all years in which corrections or additions have been published.

Plant Patents, Plant Breeders' Rights and Establishment

The *Code*, page 64, under DIVISION IV: REGISTRATION OF NAMES states:

3) *A statutory plant registration authority is an organization established by national legal enactment or by international treaty, which, as part of its remit, establishes variety denominations or other names for plants. Names established by statutory plant registration authorities must be cited in the relevant register and checklist.*

A table of all hosta cultivars known to be established per statutory authorities is now included as Appendix A of the *Cumulative Index*. Cultivars listed therein are “established” via the legal protection(s) shown and thus are not available for use by anyone other than the original applicant.

Corrections and Comments

H. ‘Pebble Creek Crackerjacks’ (2019) - was originally registered with incorrect clump and leaf details.

Corrected details are as follows:

Plant: 40in (101.6cm) diameter; 22in (55.9cm) high; upright; moderate growth rate

Leaf: 15in (38.1cm) long; 5in (12.7cm) wide; 10 to 11 vein pairs; medium green with slightly rippled margins; slightly shiny on top; glaucous bloom underneath; lance-shaped with tapered base; relatively flat overall.

H. ‘Delona's Smile’ (2013) was originally registered with dimensions from a juvenile specimen.

Corrected details are as follows:

Plant: 40in (101.6cm) diameter; 20in (50.8cm) high; mound-like; moderate growth rate.

Leaf: 10in (25.4cm) long; 8in (20.3cm) wide; 12 to 14 vein pairs; yellow; heavy ripples; dull on top; slight glaucous bloom underneath; ovate with a cordate base; lightly folded overall with some leaves showing light to moderate corrugation.

A

- H. 'All Fired Up'** D. E. Beilstein (ONIR)
Plant: 20in (50.8cm) diameter; 14in (35.6cm) high; mound-like; moderate growth rate
Leaf: 6.5in (16.5cm) long; 3in (7.6cm) wide; 5 to 6 vein pairs; light green with flat margins; very shiny on top; glaucous bloom underneath; ovate with round base; lightly corrugated and moderately cupped overall. Maroon petiole color runs into the veins and to mid-leaf on the mid-rib. Tight clump with leaves arranged in a neat whorl.
Scape: 30 to 32in (76.2 to 81.3cm) high; purple
Flower: 1.3in (3.2cm) long; pale lavender, petal interiors are speckled with white flecks; bell-shaped; Union County, OH; 7/15 to 8/15
Seed: sets viable seed, green pods
Clump History: original seedling; 4 yrs old; Union County, OH
Notable Characteristics: Medium sized clump of neatly arranged, cupped and puckered light green leaves with maroon petiole color extending into the leaves.
Pod Parent: *H. 'Lemon Snap'*
Pollen Parent: {*H. 'Maya Kingsnake'* × [*H. 'Neat Splash'* × *H. 'Rising Sun'*] × [*H. 'Grand Slam'* × OP]} × [*H. 'Red Puppy'* × *H. 'Floramora'*] × *H. 'Fashionista'*]
- H. 'Angel Falls'** H. Hansen (ONR) Walters Gardens (I)
Plant: 64in (162.6cm) diameter; 40in (101.6cm) high; mound-like; slow growth rate
Leaf: 15in (38.1cm) long; 11in (27.9cm) wide; 15 vein pairs; creamy white with 1 to 2.5in (2.5 to 6.4cm) wide green, heavily rippled margins; dull on top; glaucous bloom underneath; broadly ovate with cordate base; reverse cupped (dome like) overall with tri-color interest.
Scape: 24 to 33in (61.0 to 83.8cm) high; green
Flower: 2in (5.1cm) long; pure white; tubular; Zeeland, MI; 7/15 to 8/15
Seed: sets non-viable seed, green pods
Clump History: original sport; 7 years old; Zeeland, MI
Notable Characteristics: White centered sport of *H. 'Niagara Falls'* with chartreuse color pattern where margin and center overlap.
Parentage: Sport of *H. 'Niagara Falls'*
Seasonal Color: cream centers mature to creamy-white.

B

- H. 'Beeno'** B. Ansevics (ON) Hornbaker Gardens, Inc. (IR)
Plant: 52in (132.1cm) diameter; 26in (66cm) high; mound-like; fast growth rate
Leaf: 13in (33cm) long; 9in (22.9cm) wide; 12 to 14 vein pairs; blue green with .5in (1.3cm) wide, white, slightly rippled margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; lightly wavy and corrugated overall with irregular margins that jet or streak into the centers
Scape: 32 to 36in (81.3 to 91.4cm) high; soft blue green
Flower: 2in (5.1cm) long; pure white, translucent margins; tubular; Princeton, IL US; 6/1 to 7/15
Clump History: original sport; 5 years old; Princeton, IL
Notable Characteristics: pure white margins on large, blue, wavy leaves
Parentage: sport of *H. 'Bodacious Blue'*

- H. 'Berry Wavy'** S. Eason (ONR) R. Solberg (I)
Plant: 30in (76.2cm) diameter; 18in (45.7cm) high; upright; moderate growth rate
Leaf: 9in (22.9cm) long; 5in (12.7cm) wide; 8 to 10 vein pairs; blue with heavily rippled margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; lightly cupped with evenly ruffled margins and a nice satiny sheen later in the season.
Scape: 18 to 24in (45.7 to 61.0cm) high; green
Flower: 2in (5.1cm) long; near white; tubular; Durham, NC; 6/1 to 7/15
Seed: sets viable seed, green pods
Clump History: original seedling; 8 years old; Durham, NC
Notable Characteristics: Upright blue with thick ruffly leaves
Pod Parent: (*H. 'Dorothy Benedict'* × *H. 'Blue Betty Lou'*) × (*H. 'Neptune'* × *H. 'Elvis Lives'*)
Pollen Parent: [(*H. 'Iwa Soules'* × *H. 'Blue Blush'*) × OP] × [*H. 'Tongue Twister'* × (*H. 'Iwa Soules'* × *H. 'Blue Blush'*)]
Seasonal Color: blue leaves turn green later

- H. 'Blue Heron'** C. Hanna (ONIR)
Plant: 41in (104.1cm) diameter; 28in (71.1cm) high; upright; moderate growth rate
Leaf: 14.5in (36.8cm) long; 5in (12.7cm) wide; 8 to 10 vein pairs; blue green with moderately rippled margins; slightly shiny on top; glaucous bloom underneath; ovate with tapered base; deeply folded and very lightly corrugated overall with ruffled edges that extend all the way down to the very long, erect petioles.
Scape: 32 to 36in (81.3 to 91.4cm) high; green with glaucous bloom
Flower: 2in (5.1cm) long; pale lavender; tubular; Marion, OH; 06/28 - 07/15 - 07/28
Seed: sets viable seed, green pods
Clump History: original seedling; 7 years old; Marion, OH
Notable Characteristics: Very tall, erect clump of long, narrow leaves with ruffled edges. This hosta resembles a Blue Heron, from the long erect petioles that look like long legs to the boat-shaped leaves which, from the side, look like a heron's head and beak.
Pod Parent: [*H. 'Justice'* × (*H. 'Big John'* × *H. 'Love Pat'*)] × (*H. 'Sea Drift'* × *H. 'Brutus'*)
Pollen Parent: *H. 'Mesa Fringe'*

- H. 'Brasstown Bald'** H. McDonell (ONIR)
Plant: 44in (111.8cm) diameter; 21in (53.3cm) high; mound-like; moderate growth rate
Leaf: 11in (27.9cm) long; 8in (20.3cm) wide; 14 to 15 vein pairs; golden yellow with flat margins; slightly shiny on top; slightly shiny underneath; broadly ovate with cordate base; lightly corrugated overall.
Scape: 24 to 26in (61.0 to 66.0cm) high; green
Flower: 2in (5.1cm) long; near white with wide medium lavender mid-ribs; tubular; Fayetteville, Georgia; before 6/1
Seed: sets viable seed, green pods
Clump History: original sdlg; 15 yrs old; Fayetteville, Georgia
Notable Characteristics: Holds bright gold color uniformly all season. This bright, brass-colored hosta stands proudly among its surroundings, much like Brasstown Bald stands as the highest point in the state of Georgia.
Parentage: *H. 'Abiqua Recluse'* × *H. 'Krugerrand'*

2025 REGISTRATIONS

H. 'Buckeye Candy' C. Hanna (ONIR)
Plant: 45in (114.3cm) diameter; 24in (61.0cm) high; mound-like; moderate growth rate
Leaf: 7in (17.8cm) long; 6in (15.2cm) wide; 10 to 11 vein pairs; dark green with heavily rippled margins; slightly shiny on top; dull underneath; nearly round with cordate base; lightly cupped overall with prominent veins and twisted leaf tips.
Scape: 30 to 34in (76.2 to 86.4cm) high; purple
Flower: 2.25in (5.7cm) long; pale purple, white edges and translucent margins; tubular; Marion, OH; 7/15 to 8/15
Seed: sets viable seed, green pods
Clump History: original seedling; 13 years old; Marion, OH
Notable Characteristics: Dense clump of dark green leaves with heavily rippled margins; cupped like *H. 'Candy Dish'* but with larger leaves. *H. 'Buckeye Candy'* will be the convention plant for the 2026 AHS Convention.
Parentage: *H. 'Candy Dish'* × (*H. 'Brutus'* × *H. montana* f. *macrophylla*)

H. 'Burgundy Blush' H. Hansen (ONR) Walters Gardens (I)
Plant: 32in (81.3cm) diameter; 20in (50.8cm) high; mound-like; moderate growth rate
Leaf: 10in (25.4cm) long; 5.5in (14.0cm) wide; 8 vein pairs; dark green with burgundy veins and slightly rippled margins; glaucous bloom on top; glaucous bloom underneath; ovate with round base; lightly wavy overall with burgundy veins and cross veins.
Scape: 13 to 15in (33.0 to 38.1cm) high; deep burgundy
Flower: 1.75in (4.4cm) long; deep purple, lighter purple interior with very narrow white margins; tubular; Zeeland, MI; 8/15 to 10/1
Clump History: original seedling; 13 years old; Zeeland, MI
Notable Characteristics: Dark green leaves with reddish purple veins that are most pronounced in spring and in bright light.
Parentage: (unnamed sdlg × *H. 'Blue Cascade'*) × Avent 99-106

H. 'Buttonwood Bay' R. Solberg (ONIR)
Plant: 28in (71.1cm) diameter; 15in (38.1cm) high; mound-like; moderate growth rate
Leaf: 8in (20.3cm) long; 4in (10.2cm) wide; 6 vein pairs; intense blue green with heavily rippled margins; glaucous bloom on top; glaucous bloom underneath; ovate with flat base; lightly folded and twisted overall with nicely ruffled edges.
Scape: 30 to 34in (76.2 to 86.4cm) high; blue green
Flower: 2in (5.1cm) long; pale lavender; tubular; Franklinton, NC; 8/15 to 10/1
Clump History: original seedling; 4 years old; Franklinton, NC
Notable Characteristics: Tight, medium-sized clump of very blue and highly ruffled leaves.
Parentage: *H. 'Tongue Twister'* × (*H. 'Tongue Twister'* × OP)

C

H. 'Cat in the Hat' K. Sisson (OIR) J. Ward (N)
Plant: 50in (127.0cm) diameter; 30in (76.2cm) high; mound-like; moderate growth rate
Leaf: 15in (38.1cm) long; 12in (30.5cm) wide; 14 to 16 vein pairs; chartreuse with 1 to 3in (2.5 to 7.6cm) wide, deep blue green, flat margins; dull on top; dull underneath; broadly ovate with cordate base; moderately corrugated overall with light dome-like cupping.
Scape: 40 to 44in (101.6 to 111.8cm) high; light to medium green

Flower: 1.8in (4.6cm) long; pale lavender, near white edges with light lavender striping; tubular; Avon, CT; 6/1 to 7/15
Seed: sets seed, viability unknown
Clump History: original sport; 6 years old; Avon, CT
Notable Characteristics: Large clump of thick leaves that makes a bold statement in the garden.
Parentage: Sport of *H. 'Fat Cat'*

H. 'Cheesehead' M. Zilis (O) MRHS (NI) M. Vertz (R)
Plant: 64in (162.6cm) diameter; 27in (68.6cm) high; mound-like; moderate growth rate
Leaf: 12in (30.5cm) long; 10in (25.4cm) wide; 15 to 16 vein pairs; greenish yellow to golden yellow with slightly rippled margins; dull on top; glaucous bloom underneath; broadly ovate with cordate base; deeply corrugated overall.
Scape: 27 to 29in (68.6 to 73.7cm) high; green
Flower: near white, pale violet striping; tubular; De Pere, WI; 6/1 to 7/15
Seed: sets seed, viability unknown
Clump History: division; 11 years old; De Pere, WI
Notable Characteristics: Corrugation and heavy substance add visual interest and slug resistance. Near white flowers appear mid-June to early July. First hosta to be a loyal fan of the Green Bay Packers! 2014 Midwest Regional Convention gift plant.
Parentage: Sport of *H. 'Moonrise'*
Seasonal Color: lutescent

H. 'Christine's Joy' M. Zilis (O) J. Parisi (NR) R. Solberg (I)
Plant: 18in (45.7cm) diameter; 8in (20.3cm) high; mound-like; fast growth rate
Leaf: 3in (7.6cm) long; 2in (5.1cm) wide; 6 to 7 vein pairs; dark green with slightly rippled margins; very shiny on top; slightly shiny underneath; ovate with tapered base; relatively flat overall.
Scape: 10 to 12in (25.4 to 30.5cm) high; green
Flower: pale purple; tubular; Franklinton, NC US; 6/1 to 7/15
Clump History: original sport; 3 years old; Franklinton, NC
Notable Characteristics: Small, shiny, dark green leaves in a tight clump.
Parentage: Sport of *H. 'Tiki Bar'*

H. 'Cloudland Canyon' H. McDonell (ONIR)
Plant: 40in (101.6cm) diameter; 20in (50.8cm) high; mound-like; moderate growth rate
Leaf: 9in (22.9cm) long; 7.5in (19.1cm) wide; 13 to 15 vein pairs; intense blue green with flat margins; glaucous bloom on top; dull underneath; broadly ovate with cordate base; lightly cupped and moderately corrugated overall.
Scape: 16 to 19in (40.6 to 48.3cm) high; green
Flower: 2.1in (5.4cm) long; white with faint lavender interior streaks; tubular; Fayetteville, Georgia; before 6/1
Seed: sets viable seed, green pods
Clump History: original sdlg; 18 yrs old; Fayetteville, Georgia
Notable Characteristics: Intense blue green color.
Parentage: *H. 'Skylight'* × *H. 'Silver Bay'*

H. 'Cosmic Alligator' R. Kuenster (ONIR)
Plant: 48in (121.9cm) diameter; 19in (48.3cm) high; upright; moderate growth rate
Leaf: 16in (40.6cm) long; 7.5in (19.1cm) wide; 14 to 16 vein pairs; blue with slightly rippled margins; glaucous bloom on top; glaucous bloom underneath; elliptical with cordate base; lightly folded and deeply corrugated overall.
Scape: 30 to 36in (76.2 to 91.4cm) high; blue

Scape Bracts: .5in (1.3cm) long
Flower: 1.8in (4.4cm) long; near white, light lavender stripes; tubular; Iowa City, IA; 7/15 to 8/15
Seed: sets viable seed, blue green pods
Clump History: division; 7 years old; Iowa City, IA
Notable Characteristics: Unruly habit and the heavy corrugation goes well with the elongated leaf shape.
Pod Parent: (*H.* 'Ma Breeder' × *H.* 'Blue Pebbles') × (*H.* 'Cosmic Knuckles' × *H.* 'Website')
Pollen Parent: *H.* 'Tidewater'

***H.* 'Cosmic Big Bucks'** R. Kuenster (ONIR)
Plant: 42in (106.7cm) diameter; 16in (40.6cm) high; mound-like; moderate growth rate
Leaf: 10.5in (26.7cm) long; 8.5in (21.6cm) wide; 13 to 15 vein pairs; green with streaks of cream and yellow with moderately rippled margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; lightly cupped and moderately corrugated overall with twisted leaf tips.
Scape: 35 to 38in (88.9 to 96.5cm) high; green with cream stripes
Scape Bracts: small with lightly striped edges
Flower: 1.5in (3.8cm) long; near white, light lavender stripes and translucent margins; tubular; Iowa City, IA; 7/15 to 8/15
Seed: sets viable seed, streaky green pods
Clump History: division; 5 years old; Iowa City, IA
Notable Characteristics: I really like the way the leaves sit on the plant for easy viewing.
Pod Parent: (*H.* 'Cosmic Buddy' × (*H.* 'Purple Verticulated Elf' × *H.* 'Geneva Remembrance')) × (*H.* 'Cosmic Knuckles' × *H.* 'Cosmic Blue Seas')
Pollen Parent: *H.* 'Troubled Waters'

***H.* 'Cosmic Big Stuff'** R. Kuenster (ONIR)
Plant: 60in (152.4cm) diameter; 32in (81.3cm) high; upright; moderate growth rate
Leaf: 17in (43.2cm) long; 12in (30.5cm) wide; 13 to 15 vein pairs; blue green streaked with varying shades of green and cream, with slightly rippled margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; lightly cupped and corrugated overall.
Scape: 38 to 44in (96.5 to 111.8cm) high; green with striping
Scape Bracts: bracts have darker edges
Flower: 2in (5.1cm) long; near white, light lavender striping; tubular; Iowa City, IA; 7/15 to 8/15
Seed: sets viable seed, striped green pods
Clump History: division; 5 years old; Iowa City, IA
Notable Characteristics: A nice large breeder that I enjoy.
Pod Parent: *H.* 'Cosmic Hurricane' × [(*H.* 'Cosmic Hurricane' × *H.* 'Humpback Whale') × *H.* 'Empress Wu']
Pollen Parent: (*H.* 'Cosmic Blue Seas' × *H.* 'Humpback Whale')

***H.* 'Cosmic Entertainer'** R. Kuenster (ONIR)
Plant: 42in (106.7cm) diameter; 19in (48.3cm) high; mound-like; moderate growth rate
Leaf: 12in (30.5cm) long; 9.5in (24.1cm) wide; 15 to 17 vein pairs; blue green streaked with cream and yellow, with slightly rippled margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; lightly cupped and moderately corrugated overall.
Scape: 38 to 44in (96.5 to 111.8cm) high; blue green with striping

Scape Bracts: .5in (1.3cm) long
Flower: 1.5in (3.8cm) long; near white, light lavender striping; tubular; Iowa City, IA; 7/15 to 8/15
Seed: sets viable seed, blue green pods
Clump History: division; 5 years old; Iowa City, IA
Notable Characteristics: Very fertile with tons of flowers. Has been divided a couple of times. (I always divide the streakers I use, so I do not lose the whole plant in a bad winter.)
Pod Parent: (*H.* 'Fudge Ripple' × *H.* 'Purple Verticulated Elf') × (*H.* 'Chocolate Ripple' × (*H.* 'Smoke Signals' × *H.* 'Lakeside Full Tide'))
Pollen Parent: *H.* 'Cosmic Beer Brat'

***H.* 'Cosmic Hot Stuff'** R. Kuenster (ONIR)
Plant: 48in (121.9cm) diameter; 26in (66.0cm) high; mound-like; moderate growth rate
Leaf: 15in (38.1cm) long; 12.5in (31.8cm) wide; 13 to 15 vein pairs; green streaked with cream and yellow, with slightly rippled margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; lightly cupped and corrugated overall.
Scape: 48 to 55in (121.9 to 139.7cm) high; green with striping
Scape Bracts: .8in (1.9cm) long
Flower: 2in (5.1cm) long; near white, light lavender central stripes; tubular; Iowa City, IA; 7/15 to 8/15
Seed: sets viable seed, striped green pods
Clump History: division; 6 years old; Iowa City, IA
Notable Characteristics: Another one that is very fertile and I have divided to use in more places.
Pod Parent: (*H.* 'Cosmic Infatuation' × *H.* 'Website') × *H.* 'Diamond Lake'
Pollen Parent: *H.* 'Cosmic Crocodile'

***H.* 'Cosmic Painted Lady'** R. Kuenster (ONIR)
Plant: 38in (96.5cm) diameter; 18in (45.7cm) high; mound-like; moderate growth rate
Leaf: 9.5in (24.1cm) long; 6in (15.2cm) wide; 13 to 15 vein pairs; dark green with cream and lime green streaks, flat margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; lightly folded and cupped (both ways) and moderately corrugated overall.
Scape: 30 to 34in (76.2 to 86.4cm) high; green with cream streaks
Scape Bracts: .5in (1.3cm) long with lavender edges
Flower: 1.5in (3.8cm) long; medium lavender, lavender striping; tubular; Iowa City, IA; 7/15 to 8/15
Seed: sets seed, viability unknown
Clump History: original seedling; 6 years old; Iowa City, IA
Notable Characteristics: I like this hosta for the fullness of its clump with many leaves per eye, and the straight flower scapes.
Pod Parent: (*H.* 'Ma Breeder' × *H.* 'Blue Pebbles') × (*H.* 'Cosmic Knuckles' × unnamed sdlg)
Pollen Parent: *H.* 'Purple Verticulated Elf' × *H.* 'Geneva Remembrance'

***H.* 'Cosmic Sexy Lady'** R. Kuenster (ONIR)
Plant: 42in (106.7cm) diameter; 23in (58.4cm) high; mound-like; moderate growth rate
Leaf: 15in (38.1cm) long; 13in (33.0cm) wide; 13 to 15 vein pairs; blue with streaked shades of green, cream and yellow, with slightly rippled margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; lightly cupped and moderately corrugated overall.

2025 REGISTRATIONS

Scape: 40 to 46in (101.6 to 116.8cm) high; blue green with striping

Scape Bracts: .3in (6.4 cm) long

Flower: 1.8in (4.4cm) long; near white, light lavender stripes; tubular; Iowa City, IA; 7/15 to 8/15

Seed: sets viable seed, striped green pods

Clump History: division; 7 years old; Iowa City, IA

Notable Characteristics: A good breeder for me, I like the seedlings I get from this one.

Pod Parent: (*H.* ‘Outrageous Dragon’ × *H.* ‘Cosmic Knuckles’) × *H.* ‘Cosmic Sweet Pea’

Pollen Parent: (*H.* ‘Giantland Thor’ × *H.* ‘Niagara Falls’)

***H.* ‘Cosmic Stormy Nights’** R. Kuenster (ONIR)

Plant: 44in (111.8cm) diameter; 32in (81.3cm) high; upright; moderate growth rate

Leaf: 14in (35.6cm) long; 9in (22.9cm) wide; 14 to 16 vein pairs; blue streaked with cream and shades of green, with slightly rippled margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; slightly wavy overall with deeply impressed veins

Scape: 44 to 48in (111.8 to 121.9cm) high; green with glaucous bloom

Flower: 2.5in (6.4cm) long; pale lavender with medium lavender striping; tubular; Iowa City, IA; 7/15 to 8/15

Seed: sets viable seed, striped green pods

Clump History: division; 6 years old; Iowa City, IA

Notable Characteristics:

Pod Parent: (*H.* ‘Chocolate Ripple’ × *H.* ‘Cosmic Blue Seas’) × *H.* ‘Niagara Falls’

Pollen Parent: *H.* ‘Smoke Signals’ × *H.* ‘Diamond Lake’

***H.* ‘Cosmic Treasure Chest’** R. Kuenster (ONIR)

Plant: 40in (101.6cm) diameter; 18in (45.7cm) high; mound-like; moderate growth rate

Leaf: 11in (27.9cm) long; 9in (22.9cm) wide; 12 to 14 vein pairs; green streaked with cream and shades of green, with slightly rippled margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; lightly wavy overall with widely spaced veins.

Scape: 29 to 33in (73.7 to 83.8cm) high; green with glaucous bloom

Flower: 1.3in (3.2cm) long; near white, light lavender stripes; tubular; Iowa City, IA; 7/15 to 8/15

Seed: sets viable seed, striped green pods

Clump History: division; 5 years old; Iowa City, IA

Notable Characteristics:

Pod Parent: (*H.* ‘Cosmic Mad Scientist’ × *H.* ‘Beer Belly Blues’) × (*H.* ‘Lakeside Treasure Chest’ × *H.* ‘Blue Hawaii’)

Pollen Parent: *H.* ‘Purple Verticulated Elf’ × *H.* ‘Geneva Remembrance’

***H.* ‘Cosmic Whale’** R. Kuenster (ONIR)

Plant: 44in (111.8cm) diameter; 26in (66.0cm) high; mound-like; moderate growth rate

Leaf: 11.8in (30.0cm) long; 10.3in (26cm) wide; 13 to 15 vein pairs; many shades of green with yellow streaks, with slightly rippled margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; lightly wavy and corrugated overall with an unusual fold under on many leaf ends.

Scape: 52 to 56in (132.1 to 142.2cm) high; green

Scape Bracts: .5 to .8in (1.3 to 1.9cm) long striped green and cream

Flower: 2in (5.1cm) long; near white, light lavender striping; tubular; Iowa City, IA; 7/15 to 8/15

Seed: sets viable seed, streaked green pods

Clump History: division; 5 years old; Iowa City, IA

Notable Characteristics: I like how the leaves are held towering on long erect petioles.

Pod Parent: [*H.* ‘Cosmic Hurricane’ × ((*H.* ‘Cosmic Hurricane’ × *H.* ‘Humpback Whale’) × *H.* ‘Empress Wu’)]

Pollen Parent: *H.* ‘Humpback Whale’

***H.* ‘Cosmic Zebra Stripes’** R. Kuenster (ONIR)

Plant: 28in (71.1cm) diameter; 14in (35.6cm) high; upright; moderate growth rate

Leaf: 8in (20.3cm) long; 2in (5.1cm) wide; 4 to 5 vein pairs; blue streaked with cream and yellow, with slightly rippled margins; glaucous bloom on top; glaucous bloom underneath; lance-shaped with tapered base; lightly folded and twisted with downward curves.

Scape: 20 to 24in (50.8 to 61.0cm) high; green with striping

Scape Bracts: small

Flower: 1.5in (3.8cm) long; medium lavender with off-white stripes; tubular; Iowa City, IA; 8/15 to 10/1

Seed: sets viable seed, blue green (with some striping) pods

Clump History: division; 6 years old; Iowa City, IA

Notable Characteristics: Cute narrow spikes of stripes.

Pod Parent: *H.* ‘Misty May’ × *H.* ‘Blue Cascade’

Pollen Parent: (*H.* ‘Curly Fries’ × *H.* ‘Smoke Signals’) × *H.* ‘Curly Fries’

***H.* ‘Coxhall Gardens’** R. Fox (O) G. R. Goodwin (NIR)

Plant: 42in (106.7cm) diameter; 18in (45.7cm) high; mound-like; moderate growth rate

Leaf: 10in (25.4cm) long; 7in (17.8cm) wide; 11 to 13 vein pairs; dark green with 1 to 1.5in (2.5 to 3.8cm) wide, creamy white, slightly rippled margins; slightly shiny on top; dull underneath; broadly ovate with cordate base; lightly wavy and very lightly corrugated overall with intermittent grayish-green streaks and some leaf tips that curl under.

Scape: 15 to 20in (38.1 to 50.8cm) high; medium green

Flower: 1.5in (3.8cm) long; pure white, alternate petals have translucent margins; tubular; Zionsville, IN; 6/1 to 7/15

Seed: sets viable seed, medium green pods

Clump History: original seedling; 3 years old; Zionsville, IN

Notable Characteristics: Nicely mounded clump of dark green wavy rimmed blades accented with grayish-green streaks and irregular white to creamy margins.

Parentage: *H.* ‘Justice’ × OP

Seasonal Color: creamy margins in spring change to white in summer

***H.* ‘Crinkle Cut Fries’** S. Proctor (ONIR)

Plant: 32in (81.3cm) diameter; 15in (38.1cm) high; mound-like; fast growth rate

Leaf: 9in (22.9cm) long; 1.5in (3.8cm) wide; 4 to 6 vein pairs; dark green with moderately rippled margins; dull on top; glaucous bloom underneath; lance-shaped with tapered base; lightly wavy overall with reddish-purple spotted petioles.

Scape: 25 to 32in (63.5 to 81.3cm) high; purple speckled

Flower: 2in (5.1cm) long; pale purple, purple stripes; tubular; Huddersfield, West Yorkshire, England; 7/15 to 8/15

Seed: sets viable seed, green pods

Clump History: original seedling; 8 years old; Huddersfield, West Yorkshire, England

Notable Characteristics: This cultivar takes its leaf shape from its pod parent, and its vigor & spotted petioles from its pollen parent.

Parentage: *H.* ‘Curly Fries’ × *H.* ‘Tokyo Smog’

D

***H.* ‘Dance Party’** M. Dammen (ONIR)

Plant: 20in (50.8cm) diameter; 8in (20.3cm) high; mound-like; moderate growth rate

Leaf: 6in (15.2cm) long; 3.5in (8.9cm) wide; 7 to 8 vein pairs; golden yellow with slightly rippled margins; dull on top; dull underneath; ovate with flat base; lightly corrugated overall with twisted tips.

Scape: 19 to 21in (48.3 to 53.3cm) high; red speckled

Flower: 2in (5.1cm) long; pale lavender; bell-shaped
Hollandale, MN; 6/1 to 7/15

Seed: sets viable seed, reddish green pods

Clump History: original seedling; 5 years old; Hollandale, MN

Notable Characteristics: Lightly ruffled and corrugated leaves emerge a golden yellow with a hint of light green. As the season progresses, the leaves turn light green; held on red speckled petioles. Similar to *H.* ‘Lipstick Blonde’ except the margins are slightly more wavy, the leaves are a bit wider and slightly more chartreuse in early spring.

Parentage: *H.* ‘Flemish Beauty’ × OP

Seasonal Color: golden yellow changes to light green as the season progresses.

***H.* ‘Daydream Believer’** H. Hansen (ONR) Walters Gardens (I)

Plant: 70in (177.8cm) diameter; 29in (73.7cm) high; mound-like; moderate growth rate

Leaf: 12in (30.5cm) long; 9in (22.9cm) wide; 14 vein pairs; chartreuse yellow with 1 to 2.5in (2.5 to 6.4cm) wide, blue, flat margins; glaucous bloom on top; glaucous bloom underneath; nearly round with cordate base; lightly cupped and moderately corrugated overall.

Scape: 25 to 37in (63.5 to 94.0cm) high; green

Flower: 2in (5.1cm) long; pale lavender, white with translucent interior lavender stripes; tubular; Zeeland, MI; 7/15 to 8/15

Seed: sets viable seed, green pods

Clump History: original seedling; 11 years old; Zeeland, MI

Notable Characteristics: Very large and vigorous, medio-variegated hosta.

Pod Parent: complex unnamed streaked hybrid involving *H.* ‘Neptune’ and *H.* ‘Komodo Dragon’, as well as others

Pollen Parent: *H.* ‘Empress Wu’

Seasonal Color: lightens throughout the season

***H.* ‘Derecho’** M. Dammen (ONIR)

Plant: 20in (50.8cm) diameter; 12in (30.5cm) high; mound-like; slow growth rate

Leaf: 6in (15.2cm) long; 4.8in (12.1cm) wide; 8 to 9 vein pairs; chartreuse with green streaks and .8in (1.9cm) wide green, flat margins; dull on top; dull underneath; broadly ovate with round base; lightly cupped and corrugated overall.

Scape: 16 to 18in (40.6 to 45.7cm) high; medium green

Flower: 2in (5.1cm) long; pale lavender, near white with pale lavender center stripes, bright gold pollen; tubular; Hollandale, MN; 7/15 to 8/15

Seed: sets viable seed

Clump History: original sport; 5 yrs old; Hollandale, MN

Notable Characteristics: In early spring, the leaves have chartreuse centers with some streaking, and the margins are green. As the season progresses, the leaf center darkens to emerald green (with some streaking) and the leaf margins are dark green. Finally in late season, the leaf center darkens to a medium green (with the same streaking) and the margins remain dark green.

Parentage: Sport of *H.* ‘Second Wind’

Seasonal Color: (see Notable Characteristics above)

***H.* ‘Dino Candy’** G. R. Goodwin (ONIR)

Plant: 30in (76.2cm) diameter; 8in (20.3cm) high; mound-like; moderate growth rate

Leaf: 9in (22.9cm) long; 8in (20.3cm) wide; 11 to 12 vein pairs; medium green with slightly rippled margins; very shiny on top; slightly shiny underneath; nearly round with cordate base; very lightly cupped overall with widely spaced prominent veins and ruffled edges.

Scape: 18 to 24in (45.7 to 61.0cm) high; medium green speckled purple at flowers

Flower: 1.5in (3.8cm) long; medium lavender with medium lavender central stripe; tubular; Zionsville, IN; 8/15 to 10/1

Seed: sets seed, viability unknown, medium green pods

Clump History: original seedling; 10 years old; Zionsville, IN

Notable Characteristics: Eye catching sheen on heavily ribbed blades.

Parentage: *H.* ‘Candy Dish’ × OP

***H.* ‘Dyynamic Dividend’** K. Dye (ONIR)

Plant: 29.5in (75cm) diameter; 9.4in (24cm) high; mound-like; fast growth rate

Leaf: 10.2in (26cm) long; 6.3in (16cm) wide; 9 to 11 vein pairs; greenish yellow in sun, blue green in shade with 0.2 to 2.0in (.5 to 5cm) wide white, slightly rippled margins; dull on top; dull underneath; broadly ovate with flat base; lightly wavy overall with a light glaucous coating.

Scape: 15.4 to 15.7in (39 to 40cm) high; greenish white

Scape Bracts: large variegated bracts, 5 to 20cm

Flower: 2.0in (5cm) long; pale lavender; tubular; Mapleton, IL, USA; 6/1 to 7/15

Seed: does not set seed

Clump History: original seedling; 15 years old; Mapleton, IL

Notable Characteristics: graceful, flowing semi-upright, variegated leaves

Parentage: *H.* ‘William Lachman’ × OP

E

***H.* ‘Eggs Over Easy’** M. Dammen (ONIR)

Plant: 17in (43.2cm) diameter; 8in (20.3cm) high; mound-like; moderate growth rate

Leaf: 4.5in (11.4cm) long; 1.8in (4.4cm) wide; 4 to 5 vein pairs; yellow with flat margins; dull on top; dull underneath; ovate with tapered base; very lightly wavy overall.

Scape: 7 to 9in (17.8 to 22.9cm) high; yellow green

Flower: 2in (5.1cm) long; near white, very narrow pale lavender stripes; tubular; Hollandale, MN; 8/15 to 10/1

Seed: sets viable seed

Clump History: original sdlg; 4 yrs old; Hollandale, MN

Notable Characteristics: Forms a small, low mound of bright yellow leaves appearing to almost glow. It can fade to near white with too much sun but in shade, the color will hold all

season. The near white flowers are held just above the leaves which make them fairly low to the ground.

Parentage: *H.* 'Little Jill' × OP

***H.* 'Epic Adventure'** H. Hansen (ONR) Walters Gardens (I)
Plant: 60in (152.4cm) diameter; 35in (88.9cm) high; mound-like; moderate growth rate

Leaf: 17in (43.2cm) long; 11in (27.9cm) wide; 13 to 15 vein pairs; creamy yellow with 1.5 to 5in (3.8 to 12.7cm) wide, dark green, very light undulating margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; lightly cupped overall with prominent veins and occasional medium green streaks between center and margin colors.

Scape: 26 to 32in (66.0 to 81.3cm) high; green

Flower: 2in (5.1cm) long; near white, lavender band in center with translucent margins; tubular; Zeeland, MI; 6/1 to 7/15

Seed: sets nonviable seed, white pods

Clump History: original seedling; 13 years old; Zeeland, MI

Notable Characteristics: Large symmetrical mound of dark green, medium green and creamy centered leaves.

Parentage: streaked sport of *H.* 'Empress Wu' × *H.* 'Blueberry Muffin'

Seasonal Color: center color brightens to near creamy-white throughout the season

F

***H.* 'Flibbertigibbet'** S. Proctor (ONIR)

Plant: 18in (45.7cm) diameter; 10in (25.4cm) high; upright; moderate growth rate

Leaf: 5in (12.7cm) long; 1in (2.5cm) wide; 3 to 4 vein pairs; bright chartreuse with moderately rippled margins; slightly shiny on top; very shiny underneath; lance-shaped with tapered base; lightly folded and wavy, and moderately twisted overall.

Scape: 14 to 18in (35.6 to 45.7cm) high; green

Flower: 2in (5.1cm) long; medium lavender, purple stripes with a pale lavender edge; tubular; Huddersfield, West Yorkshire, England; 7/15 to 8/15

Seed: does not set seed

Clump History: original seedling; 5 years old; Huddersfield, West Yorkshire, England

Notable Characteristics: Clump form, leaves and flowers are full of interest. A bright, lively and eye-catching hosta. It always makes us smile. Bright chartreuse leaves turn gold when sited in 2 hours or more sun.

Parentage: *H.* 'Bitsy Gold' × OP

***H.* 'Flying Monkeys'** H. Hansen (ONR) Walters Gardens (I)

Plant: 42in (106.7cm) diameter; 22in (55.9cm) high; mound-like; moderate growth rate

Leaf: 17in (43.2cm) long; 7in (17.8cm) wide; 11 vein pairs; medium green with 1 to 1.5in (2.5 to 3.8cm) wide, yellow, heavily rippled margins; dull on top; glaucous bloom underneath; ovate with cordate base; lightly folded, wavy and cupped overall with lovely rippled margins and a nice twisted drip tip at the end of each leaf.

Scape: 18 to 26in (45.7 to 66cm) high; green

Flower: 2.5in (6.4cm) long; pale lavender; tubular; Zeeland, MI; 7/15 to 8/15

Seed: sets viable seed, green pods

Clump History: original seedling; 11 years old; Zeeland, MI

Notable Characteristics: Large mound of medium green leaves

with regularly rippled, creamy margins.

Pod Parent: streaked sport of *H.* 'Cloveley' × (*H.* 'Neptune' × *H.* 'Fulda')

Pollen Parent: [streaked sport of *H.* 'Niagara Falls' × (*H.* 'Neptune' × *H.* 'Komodo Dragon')] × (*H.* 'Miss Linda Sue' × *H.* 'Fulda')

***H.* 'Foggy Falls'** M. Vertz (ONIR)

Plant: 38in (96.5cm) diameter; 22in (55.9cm) high; mound-like; fast growth rate

Leaf: 10in (25.4cm) long; 6in (15.2cm) wide; 8 to 9 vein pairs; medium green with .1 to .5in (0.3 to 1.3cm) wide, green speckled creamy white, slightly rippled margins; dull on top; dull underneath; ovate with rounded base; lightly corrugated overall. Emerging leaves are somewhat upright and fall over to form a cascading mound as they mature. Occasionally the speckled margins will bleed into the leaf centers.

Scape: 30 to 32in (76.2 to 81.3cm) high; green

Flower: pale lavender, purple stripes; tubular; De Pere, WI; 7/15 to 8/15

Seed: sets seed, viability unknown, green pods

Clump History: original sport; 5 years old; De Pere, WI

Notable Characteristics: Prominent veins accentuate the length of the leaf. The margin width varies from tip to base and is speckled like *H.* 'London Fog'. Some leaves have light green streaking in the middle. Forms a cascading mound.

Parentage: Sport of *H.* 'London Fog'

G

***H.* 'Gideon's Trumpet'** Rod Lysne (ONIR)

Plant: 40in (101.6cm) diameter; 28in (71.1cm) high; mound-like; moderate growth rate

Leaf: 11in (27.9cm) long; 7.5in (19.1cm) wide; 13 to 14 vein pairs; deep green with 2.5 to 3in (6.4 to 7.6cm) wide, gold, slightly rippled margins; dull on top; dull underneath; broadly ovate with cordate base; very light corrugation on relatively flat leaves.

Scape: 24 to 28in (61.0 to 71.1cm) high; green

Flower: near white; tubular; Ferryville, WI; 7/15 to 8/15

Seed: sets viable seed, green pods

Clump History: original seedling; 8 years old; Ferryville, WI

Notable Characteristics: Extremely broad golden borders surround a deep green center swath that usually feathers out to the sides. *H.* 'Alliteration', *H.* 'Streets of Gold', *H.* 'Cynthia' and *H.* 'Pioneer' are contributors to the unnamed pollen parent.

Parentage: *H.* 'Invocation' × unnamed sdlg

Seasonal Color: gold margins intensify in color as summer progresses

***H.* 'Golden Celebration'** D. Dean (OR)

Midwest Regional Hosta Society (NI)

Plant: 22in (55.9cm) diameter; 12in (30.5cm) high; upright; moderate growth rate

Leaf: 6.5in (16.5cm) long; 4.5in (11.4cm) wide; 8 to 9 vein pairs; yellow with slightly rippled margins; dull on top; dull underneath; broadly ovate with round base; lightly cupped & twisted and moderately folded & corrugated overall.

Scape: 15 to 17in (38.1 to 43.2cm) high; medium green

Scape Bracts: small bracts match scape color

Flower: 1.5in (3.8cm) long; medium lavender, medium lavender central stripes with near white edges; tubular; Ramsey, MN; 7/24 - 8/3 - 8/15

2025 REGISTRATIONS

Seed: sets seed, viability unknown, medium green pods
Clump History: original seedling; 5 years old; Ramsey, MN
Notable Characteristics: Smallish, slightly upright/flared clump of bright yellow leaves. Scapes & flowers are proportional to clump size. Puckered leaves that are usually seen in larger cultivars.

Pod Parent: *H.* ‘Crimson Desire’ × {[*H.* ‘Liberty Bell’ × (*H.* ‘Urajiro Hachijo’ × *H. pycnophylla*)] × *H.* ‘Ebony Spires’] × *H.* ‘Astral Bliss’}

Pollen Parent: *H.* ‘Faith’

Seasonal Color: emerges greenish yellow turning vibrant yellow by mid-season

***H.* ‘Grasshopper Green’** S. Proctor (ONIR)

Plant: 17in (43.2cm) diameter; 6.5in (16.5cm) high; mound-like; moderate growth rate

Leaf: 4.5in (11.4cm) long; 1.25in (3.2cm) wide; 3 to 4 vein pairs; dark green with flat margins; dull on top; very shiny underneath; lance-shaped with tapered base; relatively flat overall.

Scape: 12 to 15in (30.5 to 38.1cm) high; green

Flower: 1.5in (3.8cm) long; pale purple, deep purple stripes with white throat; tubular; Huddersfield, West Yorkshire, England; 6/1 to 7/15

Seed: sets viable seed, green with purple stripes pods

Clump History: original seedling; 5 years old; Huddersfield, West Yorkshire, England

Notable Characteristics: Unlike its pod parent this seedling has a cascading habit and does not grow oversize. Distinctive striped petioles. Sun tolerant. Clump (pictured online) is in 5 hours full sun.

Parentage: *H.* ‘Bitsy Green’ × OP

***H.* ‘Gulf of Mexico’** M. Rekoske (ONIR)

Plant: 48in (121.9cm) diameter; 27in (68.6cm) high; mound-like; moderate growth rate

Leaf: 14in (35.6cm) long; 10in (25.4cm) wide; 13 to 14 vein pairs; blue green with slightly rippled margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; lightly cupped and deeply corrugated overall with an unruly, crumpled appearance.

Scape: 28 to 32in (71.1 to 81.3cm) high; green

Flower: 1.5in (3.8cm) long; pure white; tubular; Richmond, IL 6/1 to 7/15

Seed: sets seed, viability unknown, green pods

Clump History: original seedling; 8 years old; Richmond, IL

Notable Characteristics: Dense unruly mound of closely spaced, heavily corrugated and cupped blue green leaves.

Parentage: Parentage Unknown

Seasonal Color: Deep green once the glaucous bloom dissipates.

H

***H.* ‘Hanjas Eros’** J. Hansen (ONIR)

Plant: 23.6in (60cm) diameter; 19.7in (50cm) high; upright; moderate growth rate

Leaf: 7.9in (20cm) long; 2.8in (7cm) wide; 6 vein pairs; green with 0.8in (2cm) wide yellow, flat margins; slightly shiny on top; slightly shiny underneath; ovate with cordate base; narrow white strip between the irregular green center and yellow margins; lightly folded, corrugated and wavy overall.

Scape: 15.7 to 23.6in (40 to 60cm) high; green

Flower: 2.0in (5cm) long; medium lavender, lavender stripes on white petals; tubular; Denmark; 7/15 to 8/15

Seed: does not set seed

Clump History: original sport; 5 years old; Denmark

Notable Characteristics: Unusual spring colour flips to reverse colour later.

Parentage: Sport of *H.* ‘Snake Eyes’

Seasonal Color: Leaves emerge green with yellow margins (and white flash between them) and throughout the season the colors flip to yellow with green margins (and the same white flash between the two colors).

***H.* ‘Hholm Assisi’** O. Onofriychuk (ONIR)

Plant: 31.5in (80cm) diameter; 31.5in (80cm) high; mound-like; slow growth rate

Leaf: 10.2in (26cm) long; 9.8in (25cm) wide; 14 to 15 vein pairs; green with 0.8 to 2.0in (2 to 5cm) wide yellow streaked with green, slightly rippled margins; slightly shiny on top; dull underneath; nearly round with cordate base; lightly wavy & corrugated overall, and convexly cupped thick leaves.

Scape: 29.5 to 31.5in (75 to 80cm) high; dark green

Flower: 2.4in (6cm) long; pale lavender, numerous flowers per scape; tubular; Kharkiv, Ukraine; 6/1 to 7/15

Seed: sets seed, viability unknown, green pods

Clump History: original seedling; 7 yrs old; Kharkiv, Ukraine

Notable Characteristics: Large bright hosta with nearly round green leaves and wide yellow (streaked with light green) margins that turn creamy during the season. The streaks of gold and light green add textural interest that resembles Assisi embroidery (an old Italian technique).

Parentage: Parentage Unknown

Seasonal Color: Yellow edge turns creamy as the season progresses.

***H.* ‘Hholm Avendesora’** O. Onofriychuk (ONIR)

Plant: 43.3in (110cm) diameter; 23.6in (60cm) high; mound-like; fast growth rate

Leaf: 15.0in (38cm) long; 7.1in (18cm) wide; 11 to 12 vein pairs; green with moderately rippled margins; slightly shiny on top; glaucous bloom underneath; ovate with cordate base; long arching leaves with prominent veins, curled tips and satiny sheen.

Scape: 25.6 to 29.5in (65 to 75cm) high; dark purple at the base, green near the flowers

Flower: 2.4in (6cm) long; pale purple with purple stripes; tubular; Kharkiv, Ukraine; 6/1 to 7/15

Seed: sets seed, viability unknown, purple speckled green pods

Clump History: original seedling; 6 yrs old; Kharkiv, Ukraine

Notable Characteristics: A vigorous hosta with beautiful long leaves and wavy edges. The leaves are well veined, have a satin sheen, and the flower bud resembles a fairy bird. Avendesora = Tree of Life (from the book series *The Wheel of Time*)

Parentage: *H.* ‘Valley’s Bossanova’ × OP

***H.* ‘Hholm Bluebell Pool’** O. Onofriychuk (ONIR)

Plant: 43.3in (110cm) diameter; 19.7in (50cm) high; mound-like; moderate growth rate

Leaf: 13.4in (34cm) long; 13in (33cm) wide; 14 to 15 vein pairs; blue with moderately rippled margins; glaucous bloom on top; glaucous bloom underneath; nearly round with cordate base; slightly convex with occasional corrugation.

Scape: 33.5 to 35.4in (85 to 90cm) high; green

Flower: 1.6in (4cm) long; pale lavender with lavender stripes; tubular; Kharkiv, Ukraine; 7/15 to 8/15

Seed: sets seed, viability unknown, green pods

Clump History: original seedling; 8 yrs old; Kharkiv, Ukraine

Notable Characteristics: Large blue almost round, convex leaves with a glaucous underside form a wide spreading clump. During emergence the leaves are light green, then they become turquoise blue with a glaucous bloom. In June, the leaves turn blue.

Parentage: *H.* 'Lemon Meringue' × OP

Seasonal Color: light green in spring to blue in summer

***H.* 'Hholm Dance of Shadows'** O. Onofriychuk (ONIR)

Plant: 25.6in (65cm) diameter; 17.7in (45cm) high; mound-like; moderate growth rate

Leaf: 10.6in (27cm) long; 7.9in (20cm) wide; 11 to 12 vein pairs; green with slightly rippled margins; slightly shiny on top; dull underneath; broadly ovate with cordate base; lightly corrugated with light dome-like cupping overall.

Scape: 27.6 to 29.5in (70 to 75cm) high; green

Flower: 2.0in (5cm) long; pale lavender; tubular; Kharkiv, Ukraine; 7/15 to 8/15

Seed: sets seed, viability unknown, light green pods

Clump History: original seedling; 8 yrs old; Kharkiv, Ukraine

Notable Characteristics: Interesting leaf coloring. Green leaves have a subtle misty speckling of different shades of green and yellow which gives the leaves additional volume and texture. With age, the leaves become wavy along the edges. Grown from bonus seeds received from Doug Beilstein.

Parentage: Parentage Unknown

***H.* 'Hholm Funny Pie'** O. Onofriychuk (ONIR)

Plant: 19.7in (50cm) diameter; 17.7in (45cm) high; mound-like; moderate growth rate

Leaf: 4.7in (12cm) long; 3.5in (9cm) wide; 7 to 8 vein pairs; green with slightly rippled margins; slightly shiny on top; glaucous bloom underneath; broadly ovate with cordate base; lightly folded overall with widely spaced veins and serrated edges on the wavy margins.

Scape: 13.8 to 17.7in (35 to 45cm) high; purple

Flower: 2.0in (5cm) long; medium lavender, purple stripes; tubular; Kharkiv, Ukraine; 8/15 to 10/1

Seed: sets viable seed, purple stripes on green pods

Clump History: original seedling; 9 yrs old; Kharkiv, Ukraine

Notable Characteristics: Graceful green leaves with serrated wavy margins. Purple speckles at the base of the leaf coalesce into dense purple on the tall petioles. The leaf shape resembles a small piece of pie.

Parentage: *H.* 'Valley's Dandy' × OP

***H.* 'Hholm Girl from Ipanema'** O. Onofriychuk (ONIR)

Plant: 31.5in (80cm) diameter; 27.6in (70cm) high; upright; moderate growth rate

Leaf: 10.6in (27cm) long; 7.1in (18cm) wide; 10 to 11 vein pairs; green with moderately rippled margins; slightly shiny on top; glaucous bloom underneath; broadly ovate with cordate base; leaf surface is relatively flat with a spectacular frill along the margins and curled tips. Some leaves are held almost vertical for optimal viewing. Petioles are red at the base.

Scape: 33.5 to 35.4in (85 to 90cm) high; green

Flower: 2.0in (5cm) long; pale lavender, lavender stripes; tubular; Kharkiv, Ukraine; 7/15 to 8/15

Clump History: original sdlg; 6 yrs old; Kharkiv, Ukraine

Notable Characteristics: An upright hosta with tall petioles. Oval green leaves with prominent veins and a beautiful wave along the edge. The name of the hosta is associated with the Bossa nova song *The Girl from Ipanema* (originally *Garota de Ipanema*). This hosta, like the girl from the song, is tall, slender and beautiful.

Parentage: *H.* 'Valley's Bossanova' × OP

***H.* 'Hholm Insensatez'** O. Onofriychuk (ONIR)

Plant: 17.7in (45cm) diameter; 19.7in (50cm) high; upright; moderate growth rate

Leaf: 7.9in (20cm) long; 3.1in (8cm) wide; 8-9 vein pairs; green with heavily rippled margins; slightly shiny on top; glaucous bloom underneath; ovate with cordate base; relatively flat overall with prominent veins and nicely ruffled edges that continue down to the red petioles.

Scape: 21.7 to 23.6in (55 to 60cm) high; red

Flower: 2.0in (5cm) long; pale purple, stripes; tubular; Kharkiv, Ukraine; 8/15 to 10/1

Seed: sets seed, viability unknown, light green pods

Clump History: original seedling; 6 yrs old; Kharkiv, Ukraine

Notable Characteristics: An upright hosta on tall red legs, with oblong, green, prominently veined leaves and wavy edges.

Parentage: *H.* 'Valley's Bossanova' × OP

Seasonal Color: light green in spring, later turns green

***H.* 'Hholm Sunny Bunny'** O. Onofriychuk (ONIR)

Plant: 17.7in (45cm) diameter; 11.8in (30cm) high; mound-like; moderate growth rate

Leaf: 7.1in (18cm) long; 5.5in (14cm) wide; 11 vein pairs; green with yellow streaks and moderately rippled margins; slightly shiny on top; dull underneath; broadly ovate with cordate base; leaves of thick substance are lightly cupped and wavy overall with ruffled edges.

Scape: 13.8 to 17.7in (35 to 45cm) high; green

Flower: 1.4in (3.5cm) long; pale lavender, lavender center stripe with white edges; tubular; Kharkiv, Ukraine; 7/15 to 8/15

Seed: sets seed, viability unknown, green pods

Clump History: original seedling; 6 yrs old; Kharkiv, Ukraine

Notable Characteristics: A small compact streaked hosta with red petioles, lightly cupped leaves and wavy edges. Medium green leaves have light green and yellow streaks that turn creamy white later in the season.

Pod Parent: (yellow sdlg 99 from *H.* 'Lakeside Knickknack' × *H.* 'Birchwood Elegance') × OP

Pollen Parent: OP

Seasonal Color: medium green turns darker green and yellow streaks turn creamy white later in the season

***H.* 'Hholm Tolstaya Dubrava'** O. Onofriychuk (ONIR)

Plant: 31.5in (80cm) diameter; 31.5in (80cm) high; mound-like; moderate growth rate

Leaf: 13in (33cm) long; 11in (28cm) wide; 14 vein pairs; blue green with 0.8 to 2in (2 to 5cm) wide yellow moderately rippled margins; slightly shiny on top; dull underneath; broadly ovate with cordate base; lightly folded and moderately wavy overall, slightly convex leaves have curved tips.

Scape: 31.5 to 35.4in (80 to 90cm) high; green

Flower: 1.6in (4cm) long; near white, pale lavender stripes; tubular; Kharkiv, Ukraine; 7/15 to 8/15

Seed: sets viable seed, green pods

Clump History: original seedling; 8 yrs old; Kharkiv, Ukraine

Notable Characteristics: Large blue green hosta with irregular

yellow margins that turn creamy white by mid-season. Large beautifully veined leaves with waves along the edges and curled tips. The name of this hosta is from the village where my grandmother and father were born. In this place there were huge centuries-old oak trees, and it was called Tolstaya Dubrava (big oak grove).

Parentage: *H.* 'Jurassic Mutator' × OP

Seasonal Color: yellow edge becomes creamy white as the season progresses

I

***H.* 'Iridescence'** G. R. Goodwin (ONIR)

Plant: 24in (61.0cm) diameter; 8in (20.3cm) high; upright; moderate growth rate

Leaf: 6.3in (15.9cm) long; 3.5in (8.9cm) wide; 6 to 7 vein pairs; dark green with moderately rippled margins; very shiny on top; very shiny underneath; elliptical with tapered base; moderately wavy overall with a fountain-like posture.

Scape: 12 to 18in (30.5 to 45.7cm) high; medium green

Flower: 1.5in (3.8cm) long; medium lavender with medium lavender stripe on center of each petal; tubular; Zionsville, IN; 8/15 to 10/1

Seed: sets viable seed, medium green pods

Clump History: original seedling; 12 years old; Zionsville, IN

Notable Characteristics: Striking, elongated dark green, extremely glossy ruffled blades.

Parentage: *H.* 'Kinba' seedling × OP

J

***H.* 'Jolly Martian'** M. Dammen (ONIR)

Plant: 32in (81.3cm) diameter; 10in (25.4cm) high; mound-like; moderate growth rate

Leaf: 10in (25.4cm) long; 4in (10.2cm) wide; 8 to 9 vein pairs; chartreuse with slightly rippled margins; glaucous bloom on top; glaucous bloom underneath; lance-shaped with tapered base; relatively flat with slight convex cupping and satiny sheen under the glaucous coating.

Scape: 20 to 22in (50.8 to 55.9cm) high; light green

Flower: 2.3in (5.7cm) long; pale lavender with lavender stripes and white throat; tubular; Hollandale, MN; 8/15 to 10/1

Seed: sets seed, viability unknown

Clump History: original seedling; 5 years old; Hollandale, MN

Notable Characteristics: Emerges with a glaucous bloom on chartreuse leaves. The base of the leaves are heavily coated in dull white wax. In summer, the leaves are a shiny light green on top and dull below. Forms a circular, low yet wide mound. *H.* 'Valley's Blue Rider' is rarely seen as a pod parent.

Parentage: *H.* 'Valley's Blue Rider' × OP

Seasonal Color: chartreuse changes to light green

***H.* 'Jumping Jacks'** M. Dammen (ONIR)

Plant: 24in (61.0cm) diameter; 12in (30.5cm) high; mound-like; moderate growth rate

Leaf: 5in (12.7cm) long; 4in (10.2cm) wide; 10 to 11 vein pairs; streaked blue, green, cream and golden yellow with flat margins; dull on top; dull underneath; broadly ovate with cordate base; very lightly cupped - both concave and dome-like.

Scape: 20 to 23in (50.8 to 58.4cm) high; medium green

Flower: 1.5in (3.8cm) long; pale lavender; bell-shaped Hollandale, MN; 7/15 to 8/15

Seed: sets seed, viability unknown, green pods

Clump History: original seedling; 4 yrs old; Hollandale, MN

Notable Characteristics: In spring the leaves are nicely streaked with blue, cream, and golden yellow. By summer the streaks are green, creamy-white, and yellow. This seedling from *H.* 'Lakeside Knickknack' has blue streaks in the spring and matures much larger overall (both clump and leaf).

Parentage: *H.* 'Lakeside Knickknack' × OP

L

***H.* 'Liberty's Torch'** D. Russell (ONIR)

Plant: 15in (38.1cm) diameter; 20in (50.8cm) high; upright; moderate growth rate

Leaf: 6in (15.2cm) long; 5in (12.7cm) wide; 10 to 11 vein pairs; yellow green with 1.5 to 2in (3.8 to 5.1cm) wide, dark green, slightly rippled margins; slightly shiny on top; dull underneath; broadly ovate with cordate base; moderately twisted, wavy and corrugated overall with tightly curled tips on stiff petioles.

Scape: 25 to 30in (63.5 to 76.2cm) high; green

Flower: 2.5in (6.4cm) long; near white, pale lavender stripes and translucent margins; bell-shaped De Pere, WI; 7/15 to 8/15

Seed: sets viable seed

Clump History: original seedling; 11 yrs old; De Pere, WI

Notable Characteristics: Upright clump of yellowish green misted leaves with wide, very dark green margins that continue down the stem to the crown. Leaves are crumpled and twisted and curl at the tip. Moderate puckering exists on the dark green marginal areas. Very thick substance.

Parentage: Parentage Unknown

Seasonal Color: centers may turn green later in the season

***H.* 'Light of the Moon'** G. R. Goodwin (ONIR)

Plant: 12in (30.5cm) diameter; 5in (12.7cm) high; mound-like; moderate growth rate

Leaf: 3.5in (8.9cm) long; 2.5in (6.4cm) wide; 7 to 9 vein pairs; lime green with .5in (1.3cm) wide, creamy white, slightly rippled margins; slightly shiny on top; slightly shiny underneath; broadly ovate with cordate base; lightly wavy overall with twisted leaf tips.

Scape: 15 to 18in (38.1 to 45.7cm) high; green

Scape Bracts: present but insignificant

Flower: 1.5in (3.8cm) long; near white; tubular; Zionsville, IN; 6/1 to 7/15

Seed: sets seed, viability unknown, light green pods

Clump History: original seedling; 10 years old; Zionsville, IN

Notable Characteristics: Interesting lime green centers surrounded by creamy white margins.

Parentage: *H.* 'Kiowa' × OP

***H.* 'Light of the World'** S. Eason (ONR) R. Solberg (I)

Plant: 24in (61.0cm) diameter; 12in (30.5cm) high; upright; moderate growth rate

Leaf: 7in (17.8cm) long; 3in (7.6cm) wide; 5 to 6 vein pairs; green with flat margins; dull on top; slightly shiny underneath; elliptical with tapered base; lightly folded and wavy overall.

Scape: 18 to 24in (45.7 to 61.0cm) high; green

Flower: 2in (5.1cm) long; fragrant; near white, purple tips on the buds and narrow purple stripes inside the petals; spider;

Durham, NC; 7/15 to 8/15

Seed: does not set seed

Clump History: original seedling; 4 years old; Durham, NC
Notable Characteristics: Tight bunch of fragrant spider type flowers at the top of each scape resemble a Lycoris bloom. Flowers go all the way around the scape. Upright plant with narrow leaves.

Parentage: unnamed sport of *H.* 'Royal Standard' × *H.* 'Sugar Babe'

M

H. 'Mouse on the Moon' R. Solberg (ONIR)
Plant: 8in (20.3cm) diameter; 4in (10.2cm) high; mound-like; moderate growth rate

Leaf: 3in (7.6cm) long; 1.5in (3.8cm) wide; 6 to 7 vein pairs; slightly blue green with .5in (1.3cm) wide, creamy white, flat margins; glaucous bloom on top; glaucous bloom underneath; ovate with tapered base; deeply twisted and wavy overall.

Scape: 6 to 7in (15.2 to 17.8cm) high; glaucous blue green

Flower: 1.3in (3.3cm) long; medium lavender; tubular; Franklinton, NC; 6/1 to 7/15

Seed: does not set seed

Clump History: original sport; 3 years old; Franklinton, NC
Notable Characteristics: *H.* 'Blue Mouse Ears' type with highly ruffled and twisted white margins on blue-green centers.

Parentage: Sport of *H.* 'Mouse Madness'

Seasonal Color: creamy white margins become light green in summer

H. 'Mrs Cleaver' B. Ragland (O) G. Hicks (NR) J. Mayberry (I)
Plant: 36in (91.4cm) diameter; 15in (38.1cm) high; mound-like; moderate growth rate

Leaf: 9in (22.9cm) long; 6in (15.2cm) wide; 13 vein pairs; light green with 1.5in (3.8cm) wide, dark green, flat margins; slightly shiny on top; dull underneath; ovate with cordate base; relatively flat overall, will take several hours of sun.

Scape: 13 to 16in (33 to 40.6cm) high; light green with glaucous bloom

Flower: 1.5in (3.8cm) long; pale lavender; tubular; Plattsmouth NE; 7/15 to 8/15

Seed: sets seed, viability not submitted, medium green pods

Clump History: original sport; 12 yrs old; Plattsmouth NE
Notable Characteristics: Unique light green center and dark green margin.

Parentage: Sport of *H.* 'June'

N

H. 'Night's End' H. McDonell (ONIR)
Plant: 37in (94.0cm) diameter; 19in (48.3cm) high; mound-like; moderate growth rate

Leaf: 9in (22.9cm) long; 6.5in (16.5cm) wide; 13 to 15 vein pairs; greenish gold with .5 to 1.3in (1.3 to 3.2cm) wide, dark green, flat margins; slightly shiny on top; slightly shiny underneath; ovate with cordate base; relatively flat overall and the irregular margin color often streaks into the leaf centers.

Scape: 23 to 26in (58.4 to 66.0cm) high; green

Flower: 2in (5.1cm) long; near white, medium lavender midribs and translucent margins; tubular; Fayetteville, GA; 05/15 - 05/20 - 05/25

Seed: sets viable seed, green pods

Clump History: original sport; 6 years old; Fayetteville, GA
Notable Characteristics: Strongly contrasting leaf color and prominent veins

Parentage: Sport of *H.* 'Brasstown Bald'

O

H. 'Ocean Isle Gold Dust' D. Chopko (ONI) B. Ankney (R)
Plant: 29in (73.7cm) diameter; 16in (40.6cm) high; mound-like; moderate growth rate

Leaf: 7in (17.8cm) long; 4.5in (11.4cm) wide; 7 to 9 vein pairs; gold misted with variable amounts of green with .3 to .5in (0.6 to 1.3cm) wide, dark green, slightly rippled margins; dull on top; dull underneath; ovate with round base; lightly wavy, folded & corrugated overall.

Scape: 36 to 40in (91.4 to 101.6cm) high; green

Flower: pale lavender with pale lavender stripes; tubular; Oakbrook Terrace, IL; 7/15 to 8/15

Seed: sets seed, viability unknown, green pods

Clump History: original sport; 5 yrs old; Oakbrook Terrace, IL

Notable Characteristics: Leaves appear dusted with a mist of green. Through the season, leaves change to look more like *H.* 'Gold Standard' before eventually turning all green. The plant produces new leaves throughout the growing season, so there are always multiple versions of leaf coloration present, making it a rather unusual sport of *H.* 'Gold Standard'.

Parentage: Sport of *H.* 'Gold Standard'

Seasonal Color: Leaves emerge with gold centers lightly misted with green that gradually becomes denser through the season until finally blending with the dark green margins (viridescent). Multiple stages of leaf color are present simultaneously throughout the season.

H. 'Orange Sunburst' M. Dammen (ONIR)
Plant: 18in (45.7cm) diameter; 10in (25.4cm) high; mound-like; slow growth rate

Leaf: 4.5in (11.4cm) long; 3.5in (8.9cm) wide; 7 to 8 vein pairs; golden yellow with .5in (1.3cm) wide medium green flat margins; dull on top; dull underneath; broadly ovate with cordate base; relatively flat overall.

Scape: 7 to 12in (17.8 to 30.5cm) high; medium green

Flower: 2in (5.1cm) long; near white, translucent margins; bell-shaped Hollandale, MN; 07/01 - 07/12 - 07/18

Seed: sets viable seed, green pods

Clump History: original sport; 4 years old; Hollandale, MN

Notable Characteristics: Golden orange leaf centers, medium green margins with light chartreuse between them. Later in the season, the golden centers can fade to white.

Parentage: Sport of *H.* 'Rosedale Blend Master'

H. 'Our Garden Angel' J. G. Hartmann (ON)
 L. C. Hendrickson (IR)
Plant: 30in (76.2cm) diameter; 15in (38.1cm) high; mound-like; moderate growth rate

Leaf: 6.5in (16.5cm) long; 6in (15.2cm) wide; 10 to 11 vein pairs; bright yellow with flat margins; very shiny on top; dull underneath; nearly round with cordate base; lightly cupped and intensely corrugated overall.

Flower: plant has never flowered

Seed: does not set seed

Clump History: original seedling; 11 years old; Plymouth, MN

Notable Characteristics: Very heavy substance in leaf and petioles. Leaves are extremely corrugated and slightly cupped. Bright yellow coloration in spring, chartreuse in late summer. Plant has been observed for 10 years and has never bloomed.

Parentage: Parentage Unknown

Seasonal Color: Bright yellow becoming chartreuse in summer. Bright yellow lasts longer in deep shade.

H. ‘Our Mouse’ D. E. Beilstein (ONIR)

Plant: 10in (25.4cm) diameter; 4in (10.2cm) high; mound-like; moderate growth rate

Leaf: 1.8in (4.4cm) long; 1.8in (4.4cm) wide; 8 to 9 vein pairs; lime green with .3in (0.6cm) wide, dark blue green, flat margins; glaucous bloom on top; glaucous bloom underneath; nearly round with cordate base; moderately cupped overall.

Scape: 6 to 7in (15.2 to 17.8cm) high; dark green

Flower: 1.3in (3.2cm) long; medium lavender, white star shape on proximal interior; bell-shaped; Union County, OH; 7/15 to 8/15

Seed: sets viable seed, green pods

Clump History: original sport; 6 years old; Union County, OH

Notable Characteristics: Glaucous lime green centers with wide dark blue green margins.

Parentage: Sport of *H. ‘Blue Mouse Ears’*

H. ‘Oyster Bar’ M. Zillis (O) R. Solberg (NIR)

Plant: 36in (91.4cm) diameter; 18in (45.7cm) high; upright; moderate growth rate

Leaf: 10in (25.4cm) long; 6in (15.2cm) wide; 12 to 13 vein pairs; medium blue green with .5in (1.3cm) wide, yellow to white, slightly rippled margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with round base; relatively flat overall

Scape: 20 to 24in (50.8 to 61.0cm) high; medium blue green

Flower: 2.5in (6.4cm) long; near white; tubular; Franklinton, NC; 7/15 to 8/15

Clump History: original sport; 3 years old; Franklinton, NC

Notable Characteristics: Large, long pointed blue leaves with high vein count and light yellow margins that turn white.

Parentage: Sport of *H. ‘Tidewater’*

P

H. ‘Pants on Fire’ N. Solberg (ON) R. Solberg (IR)

Plant: 26in (66.0cm) diameter; 22in (55.9cm) high; mound-like; moderate growth rate

Leaf: 9in (22.9cm) long; 6in (15.2cm) wide; 9 to 10 vein pairs; variable centers with 1in (2.5cm) wide, medium green, slightly rippled margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; lightly folded and wavy overall gaining light corrugation at maturity.

Scape: 22 to 24in (55.9 to 61.0cm) high; purple

Flower: 1.5in (3.8cm) long; pale lavender; tubular; Franklinton, NC; 7/15 to 8/15

Seed: does not set seed

Clump History: original sport; 3 years old; Franklinton, NC

Notable Characteristics: Leaves emerge with green centers that become yellow then white by fall.

Parentage: Sport of *H. ‘Dragon Fire’*

Seasonal Color: leaf centers become yellow then white

H. ‘Pebble Creek Cockleshell’ J. Kovalcsik (ONIR)

Plant: 22in (55.9cm) diameter; 20in (50.8cm) high; mound-like; moderate growth rate

Leaf: 9in (22.9cm) long; 8.5in (21.6cm) wide; 16 to 17 vein pairs; blue green with flat margins; glaucous bloom on top; glaucous bloom underneath; nearly round with cordate base; deeply cupped and corrugated and lightly twisted overall with ample cordate bases that overlap, fold, and curve. Heavily waxed in spring with white backs and deeply impressed veins.

Scape: 22 to 25in (55.9 to 63.5cm) high; glaucous blue green

Scape Bracts: pale lavender green

Flower: 1.8in (4.6cm) long; near white, pale lavender swathes on the center of the tepals, pale lavender bases, orange pollen, yellow green dot on every other tepal tip; lavender green pedicels; bell-shaped Vassar, Michigan; 6/1 to 7/15

Seed: sets viable seed, pale blue green pods

Clump History: original sdlg; 14 yrs old; Vassar, Michigan

Notable Characteristics: Blue green cordate foliage is heavily pebbled, glaucous, and concave. Leaves are reminiscent of cockleshell halves. The foliage substance is extremely sturdy, and the shell-like form is unique and memorable.

Parentage: *H. ‘H. D. Seas’* × *H. ‘Skylight’*

H. ‘Pebble Creek House Afire’ J. Kovalcsik (ONIR)

Plant: 12in (30.5cm) diameter; 9.5in (24.1cm) high; mound-like; fast growth rate

Leaf: 6in (15.2cm) long; 2in (5.1cm) wide; 5 to 6 vein pairs; olive green with moderately rippled margins; dull on top; glaucous bloom underneath; lance-shaped with tapered base; lightly folded and twisted overall with reddish veins on the underside of leaf tips and at leaf bases with thin violet lines at the leaf edges in spring. The deep magenta of the petioles extends into the leaves (both front and back) for about 2 inches.

Scape: 12.5 to 15in (31.8 to 38.1cm) high; glaucous dark purple

Scape Bracts: purple bracts that wither

Flower: 1.5in (3.8cm) long; medium purple, white edges and darker red stripe in center of every other tepal, translucent edges, orange pollen, dark purple at base where it joins the purple pedicels; tubular; Vassar, MI, USA; 8/15 to 10/1

Seed: sets viable seed, dark purplish-green pods

Clump History: original seedling; 5 yrs old; Vassar, MI

Notable Characteristics: Blazing red saturates the wide petioles and shoots far into the midrib (front and back) on this fiery fast-growing hybrid. In spring, sharp-tipped lanceolate olive-green leaves with glaucous backs have ruffled edges finely lined in violet. In August, dark purple scapes bursting with fertile flowers put on a pretty show.

Pod Parent: *H. ‘Xanadu Virginia Mary’* × *H. ‘Miss Linda Smith’*

(*H. ‘One Man’s Treasure’* × *H. ‘Strawberry Delight’*)] ×

[(*H. ‘Riptide’* × *H. pycnophylla*) × Self]

H. ‘Pebble Creek Moon Jazz’ J. Kovalcsik (ONIR)

Plant: 30in (76.2cm) diameter; 18in (45.7cm) high; mound-like; slow growth rate

Leaf: 9.5in (24.1cm) long; 7in (17.8cm) wide; 13 to 14 vein pairs; yellow with lightly serrated margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; may be lightly folded at the midrib and/or lightly domed at the tip, deeply corrugated overall. Glaucous coating remains in the midrib even as the leaves become more yellow.

Scape: 22 to 25in (55.9 to 63.5cm) high; glaucous light green

Scape Bracts: glaucous bracts are rosy lavender-green with

lavender edges; pedicels are lavender near the flower base

Flower: 1.5in (3.8cm) long; medium lavender center swathe surrounded by white with translucent edges and bright orange pollen; tubular; Vassar, Michigan; 6/29 - 7/7 - 7/15

Seed: sets viable seed, glaucous green pods

Clump History: original seedling; 14 yrs old; Vassar, Michigan

Notable Characteristics: In spring, corrugated yellow green foliage that is covered in blue wax adorns this arresting lutescent hybrid. Large nodding leaves with sharp tips gradually brighten and are presented on graceful, sturdy, glaucous petioles.

Parentage: *H.* 'Pebble Creek Silver Sensation' × select hybrid

Seasonal Color: becomes more intense yellow

***H.* 'Penelope'** B. Ankney (ONIR)

Plant: 27in (68.6cm) diameter; 18in (45.7cm) high; mound-like; moderate growth rate

Leaf: 7.5in (19.1cm) long; 6in (15.2cm) wide; 10 to 11 vein pairs; chartreuse with flat margins; dull on top; glaucous bloom underneath; broadly ovate with flat base; lightly cupped (both ways) and lightly corrugated overall.

Scape: 18 to 22in (45.7 to 55.9cm) high; green

Flower: 2in (5.1cm) long; near white, lavender stripes; tubular; Oakbrook Terrace, IL; 7/15 to 8/15

Seed: sets seed, viability unknown, green pods

Clump History: original sport; 5 yrs old; Oakbrook Terrace, IL

Notable Characteristics: leaves emerge yellow then turn chartreuse, with both yellow and chartreuse leaves present throughout the growing season.

Parentage: Sport of *H.* 'Blessings'

Seasonal Color: emerges yellow then turns chartreuse

***H.* 'Pennsylvucky Nice Try'** W. Daughenbaugh (ONIR)

Plant: 22in (55.9cm) diameter; 16in (40.6cm) high; mound-like; moderate growth rate

Leaf: 5in (12.7cm) long; 3.5in (8.9cm) wide; 4 to 5 vein pairs; medium green with flat margins; slightly shiny on top; very shiny underneath; broadly ovate with flat base; lightly wavy overall.

Scape: 24 to 28in (61.0 to 71.1cm) high; medium green

Flower: 2.5in (6.4cm) long; fragrant; pale lavender, white edges with narrow lavender central stripes; extra petaloid anthers give the appearance of a double flower; tubular; Bellefonte, PA; 8/15 to 10/1

Seed: does not set seed

Clump History: original seedling; 3 years old; Bellefonte, PA

Notable Characteristics: Large, near white fragrant flowers with extra petaloid anthers that give the appearance of a double flower.

Parentage: *H.* 'Royal Crest' × *H.* 'Moonlight Sonata'

***H.* 'Prairie's Edge'** Walters Gardens (ONI) H. Hansen (R)

Plant: 80in (203.2cm) diameter; 36in (91.4cm) high; mound-like; moderate growth rate

Leaf: 13in (33.0cm) long; 8in (20.3cm) wide; 13 vein pairs; yellow with .5 to 1.5in (1.3 to 3.8cm) wide, green slightly rippled margins; dull on top; glaucous bloom underneath; broadly ovate with cordate base; lightly corrugated overall with deeply impressed veins.

Scape: 30 to 41in (76.2 to 104.1cm) high; chartreuse

Flower: 2.5in (6.4cm) long; near white, with translucent lavender interiors; tubular; Zeeland, MI; 6/1 to 7/15

Seed: sets viable seed, green pods

Clump History: division; 7 years old; Zeeland, MI

Notable Characteristics: Large, green margined sport of *H.* 'Prairie Fire'

Parentage: Sport of *H.* 'Prairie Fire'

***H.* 'Professor Gerald Liedl PhD'** J. Petit (OIR) R. Liedl (N)

Plant: 28in (71.1cm) diameter; 14in (35.6cm) high; mound-like; moderate growth rate

Leaf: 6.5in (16.5cm) long; 5in (12.7cm) wide; 11 to 12 vein pairs; blue with flat margins; dull on top; dull underneath; nearly round with cordate base; lightly cupped and corrugated overall with cuspidate tips.

Scape: 26 to 30in (66.0 to 76.2cm) high; blue green turning purple later

Flower: 2in (5.1cm) long; near white, central slash of lavender and translucent margins; bell-shaped

; Fox Crossing, WI; 8/15 to 10/1

Seed: sets viable seed, green pods

Clump History: original seedling; 5 yrs old; Fox Crossing, WI

Notable Characteristics: Great blue color lasts all season.

Parentage: *H.* 'Hometown Hero' × *H.* 'Blueberry Muffin'

***H.* 'Proud Heart'** Rod Lysne (ONIR)

Plant: 24in (61.0cm) diameter; 20in (50.8cm) high; mound-like; moderate growth rate

Leaf: 6in (15.2cm) long; 6in (15.2cm) wide; 9 to 10 vein pairs; green with variable width white, flat margins; dull on top; dull underneath; nearly round with cordate base; lightly cupped and moderately corrugated overall with intermittent white margins that often streak into the green centers.

Scape: 14 to 16in (35.6 to 40.6cm) high; green

Flower: 1in (2.5cm) long; near white; tubular; Ferryville, WI; 7/15 to 8/15

Seed: sets viable seed, green pods

Clump History: original seedling; 8 years old; Ferryville, WI

Notable Characteristics: Rugose, heart shaped foliage with white edging that streaks down into green centers.

Parentage: Sport of *H.* 'Sweet Sunshine'

R

***H.* 'Radiant Beauty'** M. Dammen (ONIR)

Plant: 16in (40.6cm) diameter; 8in (20.3cm) high; mound-like; slow growth rate

Leaf: 4.5in (11.4cm) long; 2.5in (6.4cm) wide; 7 to 9 vein pairs; green, golden yellow and white streaks with slightly rippled margins; dull on top; dull underneath; ovate with flat base; lightly wavy overall with occasional areas of intense marginal ripples and the streaked colors continue down the petioles.

Scape: 17 to 20in (43.2 to 50.8cm) high; light green with glaucous bloom

Flower: 2in (5.1cm) long; near white, faint lavender center stripes; tubular; Hollandale, MN; 7/15 to 8/15

Seed: sets seed, viability unknown

Clump History: original seedling; 5 yrs old; Hollandale, MN

Notable Characteristics: Beautiful streaks of medium green, golden yellow, and white. Somewhat wavy and twisted leaves with narrow leaf tips. The radiant coloring lasts through the growing season.

Parentage: *H.* 'Radiant Star' × OP

***H.* 'Rango'** G. R. Goodwin (ONIR)

Plant: 20in (50.8cm) diameter; 8in (20.3cm) high; mound-like; moderate growth rate

2025 REGISTRATIONS

Leaf: 5in (12.7cm) long; 3in (7.6cm) wide; 6 vein pairs; creamy white with 1 to 1.5in (2.5 to 3.8cm) wide, dark green, slightly rippled margins; slightly shiny on top; dull underneath; ovate with cordate base; lightly folded and twisted overall with occasional light green areas between the center and margins.

Scape: 10 to 14in (25.4 to 35.6cm) high; red speckles on pale green

Scape Bracts: small creamy bracts with green margins

Flower: 1.5in (3.8cm) long; medium lavender; tubular; Zionsville, IN; 6/1 to 7/15

Seed: sets seed, viability unknown, white pods

Clump History: original seedling; 15 years old; Zionsville, IN

Notable Characteristics: Dark green margins surround creamy white, non-melting, centers on a small to medium-sized clump.

Parentage: Parentage Unknown

Seasonal Color: creamy margins in spring change to white in summer

H. 'Red River Valley' S. Proctor (ONIR)

Plant: 18in (45.7cm) diameter; 10in (25.4cm) high; mound-like; moderate growth rate

Leaf: 7in (17.8cm) long; 3in (7.6cm) wide; 6 vein pairs; medium green with moderately rippled margins; slightly shiny on top; dull underneath; lance-shaped with tapered base; lightly twisted and wavy overall with twisted tips and burgundy speckled petioles that run into the leaf base.

Scape: 12 to 15in (30.5 to 38.1cm) high; dark red speckled with pink

Flower: 1in (2.5cm) long; medium lavender, purple stripes; tubular; Huddersfield, West Yorkshire, England; 6/1 to 7/15

Clump History: original seedling; 6 years old; Huddersfield, West Yorkshire, England

Notable Characteristics: Unusual cross from a rare pollen parent.

Parentage: *H. 'Kanzi'* × *H. 'Tokyo Smog'*

H. 'Red Sky at Night' D. E. Beilstein (ONIR)

Plant: 30in (76.2cm) diameter; 18in (45.7cm) high; mound-like; moderate growth rate

Leaf: 9in (22.9cm) long; 5.5in (14.0cm) wide; 6 to 7 vein pairs; medium green with flat margins; slightly shiny on top; dull underneath; ovate with round base; very lightly corrugated overall with maroon petiole color extending significantly into the leaf.

Scape: 32 to 36in (81.3 to 91.4cm) high; purple

Flower: 1.5in (3.8cm) long; medium lavender; tubular; Union County, OH; 8/15 to 10/1

Seed: sets viable seed, green pods

Clump History: original seedling; 4 yrs old; Union County, OH

Notable Characteristics: Striking contrast between the leaf color and maroon petiole color that extends significantly into the leaf.

Pod Parent: *H. 'Designer Genes'*

Pollen Parent: {[*H. 'Redback Tavern'* × (*H. 'Granny's Rouge'* × OP)] × *H. 'Liam's Smile'*} × *H. 'Sugar Plum'*} × [*H. 'Maya Kingsnake'* × [(*H. 'Neat Splash'* × *H. 'Rising Sun'*) × *H. 'Grand Slam'*] × *H. 'Red Puppy'*]

H. 'Rollie Pollie' H. Hansen (ONR) Walters Gardens (I)

Plant: 17in (43.2cm) diameter; 8in (20.3cm) high; mound-like; fast growth rate

Leaf: 7in (17.8cm) long; 1in (2.5cm) wide; 5 vein pairs; blue with .1in (0.3cm) wide cream, heavily rippled margins; glaucous bloom on top; glaucous bloom underneath; lance-shaped with tapered base; moderately twisted overall with intensely wavy margins.

Scape: 21 to 28in (53.3 to 71.1cm) high; glaucous with purple blush

Flower: 2.5in (6.4cm) long; medium lavender, translucent margins; bell-shaped Zeeland, MI; 7/15 to 8/15

Clump History: original seedling; 4 years old; Zeeland, MI

Notable Characteristics: Narrow, wavy-edged blue leaves with creamy margins.

Pod Parent: Streaked sport of *H. 'Niagara Falls'* × [(*H. 'Neptune'* × *H. 'Winfield Blue'*) × (*H. 'Miss Linda Smith'* × *H. 'Joy Ride'*)]

Pollen Parent: *H. 'Silly String'*

H. 'Ruby Earrings' R. Solberg (OIR) E. Parks (N)

Plant: 22in (55.9cm) diameter; 14in (35.6cm) high; upright; moderate growth rate

Leaf: 6.5in (16.5cm) long; 5.5in (14.0cm) wide; 8 vein pairs; yellow with flat margins; slightly shiny on top; glaucous bloom underneath; broadly ovate with cordate base; moderately cupped and corrugated overall.

Scape: 26 to 28in (66.0 to 71.1cm) high; purple

Flower: 2in (5.1cm) long; deep purple, purple tips and central swath with white star-shaped appearance.; tubular; Franklinton, NC; 7/15 to 8/15

Seed: sets seed, viability unknown, purple pods

Clump History: original seedling; 4 yrs old; Franklinton, NC

Notable Characteristics: Bright yellow leaves are cupped and puckered with cordate "ears" at the base and reddish-maroon petiole color that extends 1/3 into the leaves.

Pod Parent: (*H. 'Smiley Face'* × *H. 'Beet Salad'*) × (*H. 'Peacock Strut'* × *H. 'Beet Salad'*)

Pollen Parent: 48/49 Best sdlg × (*H. 'Sun Shower'* × *H. 'Designer Genes'*)

Seasonal Color: yellow leaves become light green later in the season

S

H. 'Saffron Petticoats' H. & J. O'Donnell (ONIR)

Plant: 36in (91.4cm) diameter; 21in (53.3cm) high; mound-like; fast growth rate

Leaf: 14in (35.6cm) long; 9in (22.9cm) wide; 12 to 13 vein pairs; yellow with heavily rippled margins; dull on top; dull underneath; broadly ovate with cordate base; light convex cupping and moderately corrugated overall with slightly twisted leaf tips.

Scape: 30 to 31in (76.2 to 78.7cm) high; yellowish green

Flower: 2in (5.1cm) long; near white; tubular; St. Anne, IL; 6/18 - 7/1 - 7/15

Seed: sets viable seed, yellowish green pods

Clump History: original seedling; 13 years old; St. Anne, IL

Notable Characteristics: Nice symmetrically wavy edges and the yellow color holds all season (in shade).

Parentage: *H. 'Powder Blue'* × OP

H. 'Scarlet Slippers' D. E. Beilstein (ONIR)

Plant: 30in (76.2cm) diameter; 18in (45.7cm) high; upright; moderate growth rate

Leaf: 12in (30.5cm) long; 7in (17.8cm) wide; 8 to 9 vein pairs; yellow with gently undulating margins; slightly shiny on top; glaucous bloom underneath; ovate with round base; relatively flat overall with slightly wavy edges highlights the maroon petioles.

Scape: 36 to 38in (91.4 to 96.5cm) high; purple
Flower: pale lavender; tubular; Union County, OH; 8/15 to 10/1
Seed: sets viable seed, green pods
Clump History: original sdlg; 5 yrs old; Union County, OH
Notable Characteristics: Upright clump of large yellow leaves with scarlet petiole color extending significantly into the leaves.
Pod Parent: ((*H.* 'Fashionista' × *H.* 'Tequila Sunrise') × *H.* 'Maya Kingsnake') × [(*H.* 'Neat Splash' × *H.* 'Rising Sun') × (*H.* 'Grand Slam' × OP)] × *H.* 'Red Puppy']
Pollen Parent: (*H.* 'Riptide' × *H.* 'Mr Jack')

***H.* 'School Mouse'** H. Hansen (ONR) Walters Gardens (I)
Plant: 15in (38.1cm) diameter; 6in (15.2cm) high; mound-like; slow growth rate
Leaf: 3.5in (8.9cm) long; 2.5in (6.4cm) wide; 8 vein pairs; blue green with .5 to .75in (1.3 to 1.9cm) wide, chartreuse yellow, heavily rippled margins; glaucous bloom on top; glaucous bloom underneath; nearly round with flat base; moderately folded and wavy, and deeply twisted overall. Moderate corrugation is mostly confined to a strip between the chartreuse margin and blue green center.
Scape: 3.5 to 4in (8.9 to 10.2cm) high; green
Flower: 1in (2.5cm) long; pale lavender, interiors are white with lavender stripes; bell-shaped Zeeland, MI; 7/15 to 8/15
Clump History: original sport; 6 years old; Zeeland, MI
Notable Characteristics: Nicely ruffled, yellow margined sport of *H.* 'Church Mouse'
Parentage: Sport of *H.* 'Church Mouse'

***H.* 'Shades of Pale'** S. Proctor (ONIR)
Plant: 23in (58.4cm) diameter; 15in (38.1cm) high; upright; slow growth rate
Leaf: 6.5in (16.5cm) long; 3in (7.6cm) wide; 7 vein pairs; pale yellow with flat margins; dull on top; dull underneath; ovate with cordate base; moderately twisted & wavy overall and deeply folded at the leaf base.
Scape: 18 to 24in (45.7 to 61.0cm) high; pale green
Flower: 1.8in (4.4cm) long; pale lavender, wide central lavender stripe; tubular; Huddersfield, West Yorkshire, England; 6/1 to 7/15
Seed: sets viable seed, pale green pods
Clump History: original seedling; 8 years old; Huddersfield, West Yorkshire, England
Notable Characteristics: Leaf colour varies from leaf to leaf - different shades of pale lemon to pale green are displayed simultaneously at all times of the season. Thick stiff leaves and slow growth rate of the folded and twisted leaves serves up an eye-catching display.
Parentage: *H.* 'June Fever' × OP
Seasonal Color: Viridescence progresses slowly leaving some pale-yellow leaves even at the end of the season.

***H.* 'Shengdan Fen'** Donghuan Liu, Mengmeng Zhang, Jingrui Xi, Boyang Liu, Ting Zhang (OR) Donghuan Liu (NI)
Plant: 31.5in (80cm) diameter; 13.8in (35cm) high; upright; fast growth rate
Leaf: 10.2in (26cm) long; 6.7in (17cm) wide; 8 to 9 vein pairs; greyish olive green (NN137-B RHS Chart) with slightly rippled margins; slightly shiny on top; glaucous bloom underneath; broadly ovate with cordate base; relatively flat overall.
Scape: 19.7 to 23.6in (50 to 60cm) high; strong yellow green

(145A RHS Chart)
Scape Bracts: 2 × 1cm, strong yellow green (145A RHS Chart)
Flower: 2.4in (6cm) long; Very light purple (85C RHS Chart), translucent margins; tubular; Beijing, China; 6/1 to 7/15
Seed: does not set seed
Clump History: original seedling; 6 years old; Beijing, China
Notable Characteristics: Strong reproductive capacity, fast grower, long erect scapes with flowers like *H.* 'Night before Christmas'. Glaucous bloom on leaf backs. Holds up well to heat and humidity.
Parentage: Sport of *H.* 'Night before Christmas'

***H.* 'Shimmering Burgundy'** D. E. Beilstein (ONIR)
Plant: 16in (40.6cm) diameter; 12in (30.5cm) high; mound-like; moderate growth rate
Leaf: 7in (17.8cm) long; 3.5in (8.9cm) wide; 5 to 6 vein pairs; medium green with flat margins; dull on top; dull underneath; ovate with round base; relatively flat overall
Scape: 36 to 40in (91.4 to 101.6cm) high; green with deep red speckles
Flower: 1.3in (3.2cm) long; deep burgundy, petal interiors are maroon surrounded by white margins; tubular; Union County, OH; 8/15 to 10/1
Seed: sets viable seed, green pods
Clump History: original sdlg; 4 yrs old; Union County, OH
Notable Characteristics: Unusual saturated burgundy flowers.
Pod Parent: Beilstein sdlg RF 10-18-3-
Pollen Parent: Beilstein sdlg RF 22-16-1-

***H.* 'Shimmering Merlot'** D. E. Beilstein (ONIR)
Plant: 16in (40.6cm) diameter; 14in (35.6cm) high; upright; moderate growth rate
Leaf: 8in (20.3cm) long; 3.5in (8.9cm) wide; 5 to 6 vein pairs; medium green with flat margins; dull on top; dull underneath; ovate with tapered base; relatively flat overall
Scape: 30 to 32in (76.2 to 81.3cm) high; green
Flower: 1.3in (3.2cm) long; deep maroon exterior, maroon center swath surrounded by wide, bright white margins with translucent edges; tubular with recurved petals; Union County, OH; 8/15 to 10/1
Seed: sets viable seed, green pods
Clump History: original sdlg; 4 yrs old; Union County, OH
Notable Characteristics: Unusual deep maroon flowers reveal bright white margins once open.
Pod Parent: Beilstein sdlg RF 12-16-2-
Pollen Parent: Beilstein sdlg RF 10-18-4-

***H.* 'Shimmering Rose'** D. E. Beilstein (ONIR)
Plant: 20in (50.8cm) diameter; 14in (35.6cm) high; mound-like; moderate growth rate
Leaf: 7.5in (19.1cm) long; 5.5in (14.0cm) wide; 6 to 7 vein pairs; medium green with flat margins; dull on top; dull underneath; broadly ovate with round base; relatively flat overall
Scape: 30 to 32in (76.2 to 81.3cm) high; green with maroon spots
Flower: 1.25in (3.2cm) long; white with maroon stripes; tubular; Union County, OH; 8/15 to 10/1
Seed: sets viable seed, green pods
Clump History: original sdlg; 4 yrs old; Union County, OH
Notable Characteristics: Unique striped flowers
Pod Parent: Beilstein sdlg RF 8-18-8-
Pollen Parent: Beilstein sdlg RF 8-18-2-

2025 REGISTRATIONS

H. 'Shimmering Shiraz' D. E. Beilstein (ONIR)
Plant: 16in (40.6cm) diameter; 14in (35.6cm) high; upright; moderate growth rate
Leaf: 5.75in (14.6cm) long; 3in (7.6cm) wide; 5 to 6 vein pairs; medium green with flat margins; slightly shiny on top; dull underneath; ovate with round base; relatively flat overall
Scape: 30 to 32in (76.2 to 81.3cm) high; green
Flower: 1.25in (3.2cm) long; deep red, deep red center stripes on bright white with translucent margins; tubular; Union County, OH; 8/15 to 10/1
Seed: sets viable seed, green pods
Clump History: original sdlg; 4 yrs old; Union County, OH
Notable Characteristics: Unusual deep red flowers with bright white margins.
Pod Parent: Beilstein sdlg RF 10-18-3-
Pollen Parent: Rawson sdlg 8 #3

H. 'Slimline Tonic' S. Proctor (ONIR)
Plant: 22in (55.9cm) diameter; 14in (35.6cm) high; mound-like; moderate growth rate
Leaf: 6in (15.2cm) long; 5.5in (14.0cm) wide; 8 to 9 vein pairs; medium green with flat margins; dull on top; dull underneath; nearly round with round base; lightly cupped and folded and moderately corrugated overall. Sun tolerant but no appreciable colour change observed in the shade. Leaf backs are pale green.
Scape: 16 to 20in (40.6 to 50.8cm) high; dark green
Flower: 1in (2.5cm) long; pure white, green petal tips on emergence; tubular; Huddersfield, West Yorkshire, England; 6/1 to 7/15
Seed: sets viable seed, green pods
Clump History: original seedling; 8 years old; Huddersfield, West Yorkshire, England
Notable Characteristics: This hybrid retains the light corrugation, leaf shape and pure white flower of its pod parent and the smaller size and dull sheen of its pollen parent.
Parentage: *H. 'Gin and Tonic'* × *H. 'Slim and Trim'*

H. 'Sparkling Sunshine' D. Dean (ONIR)
Plant: 25in (63.5cm) diameter; 14in (35.6cm) high; upright; moderate growth rate
Leaf: 7in (17.8cm) long; 5in (12.7cm) wide; 8 to 9 vein pairs; yellow with moderately rippled margins; dull on top; dull underneath; broadly ovate with cordate base; lightly folded and corrugated overall with slightly red tips that curve downwards.
Scape: 17 to 21in (43.2 to 53.3cm) high; saturated burgundy
Scape Bracts: short bracts with white exteriors and pale lavender striped interiors
Flower: 1.5in (3.8cm) long; pale lavender with medium lavender midrib; tubular; Ramsey, MN; 8/15 to 10/1
Seed: sets seed, viability unknown, medium green pods
Clump History: original seedling; 6 years old; Ramsey, MN
Notable Characteristics: Slightly viridescent yellow becoming chartreuse later. Strongly flared posture with saturated red petioles and scapes with small white bracts that contrast with the lavender flowers.
Pod Parent: {[(*H. 'Color Fantasy'* × *H. 'Blue Clown'*) × *H. 'Silver Frost'*] × (*H. 'Love Pat'* × *H. 'Popo'*)] × *H. 'Candy Dish'*} × *H. 'Evening Inferno'*
Pollen Parent: *H. 'Night Flight'*
Seasonal Color: chartreuse later in the season

H. 'Spring Song' S. Proctor (ONIR)
Plant: 24in (61.0cm) diameter; 15in (38.1cm) high; upright; slow growth rate
Leaf: 8in (20.3cm) long; 5in (12.7cm) wide; 9 to 10 vein pairs; gold with slightly rippled margins; slightly shiny on top; slightly shiny underneath; broadly ovate with cordate base; lightly folded overall.
Scape: 14 to 18in (35.6 to 45.7cm) high; green with glaucous bloom
Flower: 2in (5.1cm) long; pale lavender, lavender stripes; tubular; Huddersfield, West Yorkshire, England; 7/15 to 8/15
Seed: sets seed, viability unknown, green pods
Clump History: original seedling; 7 years old; Huddersfield, West Yorkshire, England
Notable Characteristics: An unexpected result of an unusual cross. The leaf colour is gold overlaid with a tinge of green that results from having green veins. Sun tolerant, thick substance and very slow growing.
Parentage: *H. 'Hacksaw'* × *H. 'Brother Stefan'*

H. 'Stripe of Royalty' Rod Lysne (ONIR)
Plant: 36in (91.4cm) diameter; 24in (61.0cm) high; mound-like; moderate growth rate
Leaf: 8.5in (21.6cm) long; 7in (17.8cm) wide; 13 to 14 vein pairs; medium green with cream & gold streaks, with slightly rippled margins; dull on top; dull underneath; broadly ovate with cordate base; lightly wavy and corrugated with consistent, prominent streaking overall.
Scape: 20 to 24in (50.8 to 61.0cm) high; green
Flower: pale lavender; tubular; Ferryville, WI; 6/1 to 7/15
Seed: sets viable seed, green pods
Clump History: original seedling; 7 years old; Ferryville, WI
Notable Characteristics: Medium green foliage is heavily streaked with cream and gold.
Parentage: *H. 'William Lachman'* × *H. 'Alliteration'*

T

H. 'Teltow Hidden Valley' M. Entemann (ONIR)
Plant: 50in (127.0cm) diameter; 22in (55.9cm) high; mound-like; moderate growth rate
Leaf: 10.5in (26.7cm) long; 5in (12.7cm) wide; 9 vein pairs; greenish yellow with slightly rippled margins; slightly shiny on top; glaucous bloom underneath; ovate with flat base; relatively flat overall with lightly wavy margins.
Scape: 24 to 26in (61.0 to 66.0cm) high; green with glaucous bloom
Flower: 2in (5.1cm) long; pale lavender with medium purple stripes, flowers stand in a bundle; tubular; Teltow, Germany; 7/15 to 8/15
Seed: sets seed, viability unknown, green pods
Clump History: original sdlg; 12 years old; Teltow, Germany
Notable Characteristics: Has characteristics typical of both parents.
Parentage: *H. 'Neptune'* × *H. pycnophylla*
Seasonal Color: viridescent

H. 'Teltow Little Jolie' M. Entemann (ONIR)
Plant: 22in (55.9cm) diameter; 8in (20.3cm) high; mound-like; moderate growth rate
Leaf: 2.5in (6.4cm) long; 2in (5.1cm) wide; 6 to 7 vein pairs; greenish yellow with slightly rippled margins; slightly shiny on

top; glaucous bloom underneath; broadly ovate with cordate base; lightly twisted and very lightly corrugated overall on narrow petioles.
Scale: 15 to 16in (38.1 to 40.6cm) high; greenish yellow
Flower: 1.5in (3.8cm) long; medium lavender; tubular; Teltow, Germany; 7/15 to 8/15
Seed: sets seed, viability unknown, green pods
Clump History: original sdlg; 10 years old; Teltow, Germany
Notable Characteristics: Dense clump of viridescence yellow leaves.
Parentage: *H. nakaiana* × OP
Seasonal Color: viridescence

H. ‘Teltow White Lighthouse’ M. Entemann (ONIR)
Plant: 32in (81.3cm) diameter; 13in (33.0cm) high; mound-like; moderate growth rate
Leaf: 10in (25.4cm) long; 6in (15.2cm) wide; 11 to 13 vein pairs; green with slightly rippled margins; dull on top; glaucous bloom underneath; broadly ovate with cordate base; central leaves are lightly folded and veins are prominent overall.
Scale: 29 to 32in (73.7 to 81.3cm) high; blue green
Flower: 2in (5.1cm) long; near white; tubular; Teltow, Germany; 6/1 to 7/15
Seed: sets seed, viability unknown, green pods
Clump History: original sdlg; 7 years old; Teltow, Germany
Notable Characteristics: Near white flowers held on tall scapes.
Parentage: *H. ‘Heideturm’* × OP

H. ‘TenderShoots Let’s Be Franc’ Franc Freeman (O) B. & A Lindner (NIR)
Plant: 40in (101.6cm) diameter; 18in (45.7cm) high; mound-like; moderate growth rate
Leaf: 8in (20.3cm) long; 5in (12.7cm) wide; 7 to 8 vein pairs; green streaked with cream, with .5in (1.3cm) wide medium green slightly rippled margins; slightly shiny on top; very shiny underneath; ovate with round base; lightly wavy and corrugated overall.
Scale: 28 to 34in (71.1 to 86.4cm) high; green with red speckles
Flower: 1in (2.5cm) long; deep purple with white margins; tubular; Greenwood, WI; 8/15 to 10/1
Seed: sets viable seed, green pods
Clump History: original seedling; 7 yrs old; Greenwood, WI
Notable Characteristics: Heavily streaked small hosta with red speckled petioles and flower scapes. Progeny produced are also streaked and have red speckled petioles.
Parentage: Parentage Unknown

H. ‘TenderShoots Lily’ B. & A Lindner (ONIR)
Plant: 100in (254.0cm) diameter; 44in (111.8cm) high; upright; moderate growth rate
Leaf: 16in (40.6cm) long; 10in (25.4cm) wide; 13 to 14 vein pairs; medium green with slightly rippled margins; slightly shiny on top; dull underneath; ovate with cordate base; lightly cupped, folded and corrugated overall.
Scale: 54 to 60in (137.2 to 152.4cm) high; green
Flower: 2in (5.1cm) long; pale lavender; tubular; Greenwood, WI; 6/1 to 7/15
Seed: sets viable seed, green pods
Clump History: original seedling; 9 yrs old; Greenwood, WI
Notable Characteristics: Monstrous green hosta. Long, ovate shaped leaves have heavy substance. Great specimen plant.
Parentage: Parentage Unknown

H. ‘Thunder Rolls’ D. Rawson (O) C. Hanna (NIR)
Plant: 30in (76.2cm) diameter; 16in (40.6cm) high; upright; moderate growth rate
Leaf: 8in (20.3cm) long; 5.5in (14.0cm) wide; 11 to 12 vein pairs; medium blue green with flat margins; slightly shiny on top; glaucous bloom underneath; broadly ovate with cordate base; moderately cupped & folded and deeply corrugated overall.
Scale: 11 to 13in (27.9 to 33.0cm) high; green
Flower: 1.5in (3.8cm) long; pale lavender; tubular; Marion, OH; 7/15 to 8/15
Seed: sets viable seed, green pods
Clump History: original seedling; 9 years old; Marion, OH
Notable Characteristics: Presents an overall appearance of turmoil as in the rolling clouds of a thunderstorm. From its burly appearance to its cupped, heavily corrugated and folded leaf shape it is a standout plant that will surely invite many comments and much praise.
Parentage: Parentage Unknown

H. ‘Tiki Dance’ M. Dammen (ONIR)
Plant: 14in (35.6cm) diameter; 7in (17.8cm) high; mound-like; slow growth rate
Leaf: 4in (10.2cm) long; 1.5in (3.8cm) wide; 5 to 6 vein pairs; pale chartreuse with variable width pale yellow, slightly rippled margins; dull on top; dull underneath; lance-shaped with tapered base; lightly folded and wavy overall.
Flower: does not flower
Clump History: original sport; 8 years old; Hollandale, MN
Notable Characteristics: From the *H. ‘Striptease’* family arrives yet another sport that is uniquely different. The most pronounced difference is the pale colors of the variegation in the spring.
Parentage: Sport of *H. ‘Hanky Panky’*
Seasonal Color: Emerges with very light chartreuse centers, very pale-yellow margins and a white dividing line where they meet. By mid to late summer the centers are medium to dark green with light green margins.

H. ‘Treasure Bay’ H. McDonell (ONIR)
Plant: 34in (86.4cm) diameter; 15in (38.1cm) high; mound-like; moderate growth rate
Leaf: 9.5in (24.1cm) long; 8in (20.3cm) wide; 10 to 12 vein pairs; bright golden yellow with moderately rippled margins; dull on top; dull underneath; broadly ovate with cordate base; moderate convex cupping and deeply corrugated overall forming a very dense, ruffled clump.
Scale: 15 to 18in (38.1 to 45.7cm) high; green
Flower: 1.8in (4.4cm) long; near white, very pale lavender streaks; tubular; Fayetteville, GA; 05/10 - 05/17 - 05/25
Seed: sets viable seed, green pods
Clump History: original seedling; 6 years old; Fayetteville, GA
Notable Characteristics: Heavily puckered, intense gold domed leaves.
Pod Parent: (*H. ‘Komodo Dragon’* × OP) × *H. ‘Brother Stefan’*
Pollen Parent: *H. ‘Dahlonega’*

W

H. ‘Whale Song’ S. Proctor (ONIR)
Plant: 24in (61.0cm) diameter; 16in (40.6cm) high; mound-like; slow growth rate
Leaf: 9in (22.9cm) long; 8in (20.3cm) wide; 9 to 11 vein pairs;

light green with slightly rippled margins; dull on top; dull underneath; nearly round with cordate base; moderately corrugated overall, dome-like cupping and deeply folded at the leaf base. Leaf backs remain pale green all season.

Scape: 13 to 16in (33.0 to 40.6cm) high; dull green

Scape Bracts: very small pale bracts at the base of each flower

Flower: 2in (5.1cm) long; pure white; tubular; Huddersfield, West Yorkshire, England; 7/15 to 8/15

Seed: does not set seed

Clump History: original seedling; 5 years old; Huddersfield, West Yorkshire, England

Notable Characteristics: exhibits the ‘humped’ leaves and white flowers of its pod parent and the corrugation of its pollen parent. When flowers emerge they have yellowish-green edges and petal tips which fade to pure white after a week or so.

Parentage: *H. ‘Humpback Whale’* × *H. ‘Brother Stefan’*

Seasonal Color: turns golden yellow mid-July

H. ‘Wicked Cosmic’ Rod Kuenster (ONIR)

Plant: 34in (86.4cm) diameter; 16in (40.6cm) high; mound-like; slow growth rate

Leaf: 14in (35.6cm) long; 9in (22.9cm) wide; 14 to 15 vein pairs; blue streaked with shades of cream and yellow, slightly rippled margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; lightly cupped and moderately corrugated overall.

Scape: 38 to 44in (96.5 to 111.8cm) high; blue with striping

Flower: 1.8in (4.4cm) long; pale lavender with medium lavender stripes; tubular; Iowa City, IA; 7/15 to 8/15

Seed: sets viable seed, striped blue green pods

Clump History: division; 4 years old; Iowa City, IA

Notable Characteristics: Color, streaking and leaf form have impressed me so far. I look forward to watching it continue to change.

Pod Parent: (*H. ‘Cosmic Mad Scientist’* × *H. ‘Purple Verticulated Elf’*) × (*H. ‘Dragon Lady’* × *H. ‘Blue Cascade’*)

Pollen Parent: *H. kikutii*

H. ‘Wicked Crocodile’ Rod Kuenster (ONIR)

Plant: 38in (96.5cm) diameter; 19in (48.3cm) high; upright; moderate growth rate

Leaf: 13in (33cm) long; 8in (20.3cm) wide; 13 to 15 vein pairs; blue green streaked with cream and yellow, slightly rippled margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; moderately cupped and corrugated overall.

Scape: 36 to 40in (91.4 to 101.6cm) high; blue green

Scape Bracts: .5in (1.3cm) long with blue green margins

Flower: 1.3in (3.2cm) long; near white, very pale lavender stripes; tubular; Iowa City, IA; 7/15 to 8/15

Seed: sets viable seed, cream and yellow stripes on blue green pods

Clump History: division; 6 years old; Iowa City, IA

Notable Characteristics: I like the form passed on from *H. ‘Cosmic Crocodile’*, the flowers going around the entire scape and the long seed pods.

Pod Parent: (*H. ‘Fudge Ripple’* × *H. ‘Cosmic Crocodile’*) × (*H. ‘Blue Belly’* × *H. ‘Troubled Waters’*)

Pollen Parent: *H. ‘Purple Verticulated Elf’*

H. ‘Wicked Dream’ Rod Kuenster (ONIR)

Plant: 38in (96.5cm) diameter; 23in (58.4cm) high; upright; moderate growth rate

Leaf: 11in (27.9cm) long; 8.5in (21.6cm) wide; 13 to 15 vein pairs; blue streaked with cream, flat margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; lightly cupped and corrugated overall with some leaves moderately folded.

Scape: 30 to 34in (76.2 to 86.4cm) high; blue green

Scape Bracts: .5 (1.3cm) long

Flower: 1.5in (3.8cm) long; near white with light lavender striping; tubular; Iowa City, IA; 6/1 to 7/15

Seed: sets viable seed, cream stripes on green pods

Clump History: division; 5 years old; Iowa City, IA

Notable Characteristics: I like the upright form and how the leaves are uniformly arranged.

Pod Parent: (*H. ‘Cosmic Sexy Lady’* × *H. ‘Beer Belly Blues’*) × (*H. ‘Purple Verticulated Elf’* × *H. ‘Geneva Remembrance’*)

Pollen Parent: *H. ‘Beer Belly Blues’*

H. ‘Wicked Thrills’ Rod Kuenster (ONIR)

Plant: 42in (106.7cm) diameter; 25in (63.5cm) high; upright; moderate growth rate

Leaf: 12in (30.5cm) long; 8in (20.3cm) wide; 13 to 15 vein pairs; blue streaked with shades of yellow and cream, slightly rippled margins; dull on top; dull underneath; broadly ovate with cordate base; lightly corrugated overall with slight convex cupping.

Scape: 36 to 44in (91.4 to 111.8cm) high; striped blue green

Flower: 1.5in (3.8cm) long; pale lavender, lavender central splash and white star-shaped throat; tubular; Iowa City, IA; 7/15 to 8/15

Seed: sets viable seed, striped blue green pods

Clump History: division; 5 years old; Iowa City, IA

Notable Characteristics:

Pod Parent: (*H. ‘Wicked Mom’* × [*H. ‘Cosmic Hurricane’* × *H. ‘Humpback Whale’*] × *H. ‘Empress Wu’*]) × (*H. ‘Empress Wu’* × *H. ‘Blue Hawaii’*)

Pollen Parent: *H. ‘Cosmic Fantasy’* × *H. ‘Abiqua Drinking Gourd’*

Z

H. ‘Zi E Fen’

Donghuan Liu, Mengmeng Zhang,
Jingrui Xi, Junyu Deng, Jun Chen (OR)
Donghuan Liu (NI)

Plant: 31.5in (80cm) diameter; 15.7in (40cm) high; upright; fast growth rate

Leaf: 7.9in (20cm) long; 5.9in (15cm) wide; 8 to 9 vein pairs; greyish olive green (NN137-B RHS Chart) with slightly rippled margins; slightly shiny on top; slightly shiny underneath; nearly round with flat base; relatively flat overall.

Scape: 27.6 to 29.5in (70 to 75cm) high; strong yellow green (143C RHS Chart)

Scape Bracts: 1.5 x 1.0cm, strong yellow green (144B RHS Chart)

Flower: 2.4in (6cm) long; light purple (85B RHS Chart), translucent margins; bell-shaped Beijing, China; 6/1 to 7/15

Seed: does not set seed

Clump History: original seedling; 5 years old; Beijing, China

Notable Characteristics: Strong reproductive capacity, fast grower, long erect scapes with flowers like *H. ventricosa* and rose red coloring. Holds up well to heat and humidity.

Parentage: *H. ventricosa* × *H. ‘Essence of Summer’*
